SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés à traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

First Estimates - July 1974

Seasonally-adjusted, the first estimate(1) of the Canada industrial composite(2) index of employment (1961 = 100) rose 0.1% in June to July. Gains were recorded in all industry divisions except manufacturing, service and transportation, communication and other services. Employment increased in Ontario and the Prairie Region and declined in the three remaining regions.

Unadjusted for seasonal variations, average weekly earnings rose 1.4% in July at the Canada composite level. Increased earnings were recorded in all industry divisions and in all five regions.

Employment - (Seasonally-Adjusted)

1974

Preliminary data for June 1974 showed a rise of 0.3% in the Canada industrial composite index of employment. Increases in employment were recorded in mining, manufacturing, trade and commerce; the remaining industry divisions showed declines.

The 0.2% rise in manufacturing employment reflected widespread gains in both durables and non-durables, particularly in Ontario. Trade advanced 0.4% mainly as the result of gains in the service component. The 2.2% increase in mining employment reflected resolution of industrial disputes in metals, plus gains in mineral products and services incidental to mining. In service, a 0.3% increase was the result of advances in business and miscellaneous services.

The large decline in forestry employment reflected for the part industrial disputes in British Columbia. In transportation, communication and other utilities, decreases in transportation more than offset gains in the remaining components. The 0.2% decrease in construction mainly reflected declines in building, while in finance, insurance and real estate, both components declined.

In the *Atlantic Region*, the composite index rose 0.3%. Gains were recorded in all provinces except Newfoundland, which showed a slight decline. Increased employment in metals mining, following the resolution of agricultural disputes, plus gains in building and engineering were somewhat offset by the declines in hotels, restaurants and services.

See note on Statistical Presentation under Concepts and Methods at the back of this publication.

The Canada Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

Premières estimations - Juillet 1974

Après désaisonnalisation, la première estimation(1) de l'indice synthétique industriel(2) de l'emploi dans les activités économiques du Canada (1961 = 100) fait état d'une augmentation de 0.1% entre juin et juillet. Des augmentations ont été enregistrées dans toutes les divisions de l'activité économique, à l'exception des manufactures, des services, des transports, communications et autres services publics. L'emploi s'est accru en Ontario et dans la région des Prairies, mais il a diminué dans les trois autres régions.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 1.4% en juillet au niveau de l'ensemble des activités économiques du Canada. Cette augmentation a été enregistrée dans toutes les divisions de l'activité économique ainsi que dans les cinq régions.

Emploi - (chiffres désaisonnalisés)

Juin 1974

Les données provisoires de juin 1974 indiquent une hausse de 0.3% de l'indice synthétique industriel de l'emploi dans les activités économiques du Canada. L'emploi s'est accru dans les mines, les manufactures, le commerce et les services; les autres divisions de l'activité économique ont enregistré des baisses.

La hausse de 0.2% de l'emploi dans les manufactures reflète des augmentations généralisées dans les biens durables et non durables, en particulier en Ontario. Le commerce a progressé de 0.4% surtout à cause d'augmentations dans le commerce de détail. L'augmentation de 2.2% dans les mines traduit le règlement des conflits du travail dans les mines de métaux et des progressions dans les combustibles minéraux et dans les services miniers. Dans les services, une augmentation de 0.3% provenait en grande partie de hausses dans les services extérieurs des entreprises et dans les services divers.

La diminution importante de l'emploi dans le forage reflétait surtout les conflits du travail de la Colombie-Britannique. Dans les transports, communications et autres services publics, les baisses survenues dans les transports ont plus que compensé les hausses enregistrées dans les autres éléments. La baisse de 0.2% dans la construction trahissait surtout des régressions dans la construction du bâtiment, alors que dans les finances, assurances et immobilier, les deux éléments ont diminué.

Dans la *région de l'Atlantique*, l'indice synthétique a augmenté de 0.3%. Des hausses ont été enregistrées dans toutes les provinces, sauf à Terre-Neuve, où l'on a observé aucun changement. L'emploi s'est accru dans les mines de métaux, par suite du règlement des conflits du travail, ainsi que dans le bâtiment et le génie civil; ces hausses ont en quelque sorte été compensées par des diminutions dans les hôtels, restaurants et tavernes.

(1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.

(2) L'indice synthétique industriel s'applique à l'ensemble des activités économiques, sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours de n'importe quel mois de l'année.

The *Quebec* composite index rose 0.2% from May to June. Increases in employment were recorded in transportation, communication, logging and business services. Declines in employment occurred in non-metallic mining, durables manufacturing and both building and engineering construction.

In *Ontario*, the industrial composite index of employment jumped 0.8% in June. This rise reflected widespread gains in both durables and non-durables manufacturing. In addition, increases were recorded in transportation, communication, department stores, food stores, business and miscellaneous services.

The industrial composite index for the *Prairie Region* showed a 0.3% decline as decreases in Manitoba and Alberta more than offset gains in Saskatchewan. Industrial disputes in foods were largely responsible for the reduced employment in manufacturing. Declines were also recorded in transportation and wholesale trade. Somewhat offsetting increases occurred in services incidental to mining and in engineering construction.

The *British Columbia* composite index posted a 3.4% decline in June. For the most part, this decline reflected the impact of industrial disputes in logging and in wood products. In addition, reductions in employment occurred in metals mining, transportation and both wholesale and retail trade.

Earnings and Hours

June 1974

Seasonally-adjusted, average weekly earnings rose 0.2% from May to June at the Canada industrial composite level. Gains were recorded in all industry divisions except forestry and transportation, communication and other utilities. All provinces except British Columbia contributed to the overall rise in the level of earnings.

Unadjusted for seasonal variations, average weekly earnings rose 0.9% in June to \$176.55 at the Canada industrial composite level. All provinces shared in the overall advance. All industry divisions increased except forestry, mining and transportation, communication and other utilities.

In *forestry*, average weekly earnings dropped 6.4% in June reflecting reduced earnings in British Columbia owing to industrial disputes.

Average weekly earnings in *mining* dropped 0.3% in June to \$233.26. Gains in services incidental to mining were more than offset by declines in non-metals. Average weekly hours of hourly-rated wage-earners declined from 40.4 in May to 39.7 in June, while average hourly earnings rose 6 cents to \$5.45.

L'indice synthétique industriel du *Québec* a augmenté de 0.2% entre mai et juin. Des augmentations de l'emploi ont été enregistrées dans les transports, les communications, l'abattage et les services extérieurs des entreprises. On a observé des diminutions de l'emploi dans les mines autre que de métaux, dans la fabrication de biens durables, dans le bâtiment et même que dans le génie civil.

En *Ontario*, l'indice synthétique industriel de l'emploi a monté 0.8% en juin. Cette hausse reflète des augmentations généralisées dans la fabrication de biens durables et non durables. De plus, des progressions ont été enregistrées dans le transport, les communications, les magasins, rayons, les magasins d'alimentation, les services extérieurs des entreprises et les services divers.

L'indice synthétique industriel de l'emploi dans la *région des Prairies* a enregistré une baisse de 0.3%, car les diminutions au Manitoba et en Alberta ont plus que compensé les augmentations observées en Saskatchewan. Les conflits du travail dans le secteur des aliments étaient en grande partie responsables de la réduction de l'emploi dans les manufactures. On a également enregistré des baisses dans les transports, le commerce de gros. Ces réductions ont été quelque peu compensées par des augmentations dans les services miniers et dans le génie civil.

En *Colombie-Britannique*, on a observé une diminution de 3.4% de l'indice synthétique industriel en juin. La majeure partie de cette diminution est attribuable aux conséquences des conflits du travail dans l'abattage et les produits du bois. De plus, l'emploi a diminué dans les mines de métaux, les transports, le commerce de gros et le commerce de détail.

Gains et heures de travail

Juin 1974

Les gains hebdomadaires moyens *désaisonnalisés* au niveau de l'ensemble des activités économiques du Canada ont augmenté de 0.2% entre mai et juin. Des augmentations ont été enregistrées dans toutes les divisions de l'activité économique, sauf dans le forage et les transports, à l'exception de la Colombie-Britannique, qui a participé à l'augmentation générale du niveau des gains.

Les gains hebdomadaires moyens *désaisonnalisés* ont augmenté de 0.9% en juin, atteignant \$176.55, au niveau de l'ensemble des activités économiques du Canada. Toutes les provinces ont participé à l'augmentation générale. Les gains ont augmenté dans toutes les divisions de l'activité économique, sauf le forage, les mines et les transports, communication et autres services publics.

Dans le *forage*, les gains hebdomadaires moyens sont tombés de 6.4% en juin, reflétant des gains moindres en *Colombie-Britannique* en raison de conflits du travail.

Les gains hebdomadaires moyens dans les mines ont diminué de 0.3% en juin s'établissant à \$233.26. Les augmentations dans les services miniers ont été plus que compensées par des diminutions dans les mines autres que de métaux. Le nombre moyen d'heures hebdomadaires travaillées par des ouvriers payés à l'heure a baissé, passant de 40.4 en mai à 39.7 en juin, alors que les gains horaires moyens ont monté de 6 cents par heure à \$5.45.

In *manufacturing*, average weekly earnings increased from \$181.67 in May to \$182.96 in June as increases were recorded in both *les* and *non-durables*. Average weekly hours decreased from 39.0 to 38.8, average hourly earnings rose from \$4.27 to \$4.31.

Average weekly earnings in *construction* showed almost no change from May to June as gains in building were offset by declines in *engineering*. Average weekly hours rose from 39.1 to 40.2, while average hourly earnings dropped 2.8% to \$6.17.

In *transportation, communication and other utilities*, average weekly earnings dropped 0.5% in June mainly reflecting declines in the *communication* sector. Average weekly earnings in *trade* rose substantially for the second month in succession as widespread gains were recorded in both *wholesale* and *retail*.

Average weekly earnings in *finance, insurance and real estate* rose from \$172.10 in May to \$172.55 in June as gains in financial services more than offset declines in *insurance* and *real estate*. In June, average weekly earnings rose 2.3% to \$126.45 with increases in all four components.

Year-to-date

Employment

The average of the first six months of 1974, compared with the same period a year earlier, showed a 5.9% rise in employment at the national industrial composite level. The largest gain was in *service* (10.0%); the only decline was in *forestry*. All provinces showed higher levels of employment over-the-year ranging from 4.8% in *Quebec* to 9.4% in *Scotia*.

Earnings

The average of the first half of 1974, compared with the same period for 1973, showed an 8.9% rise in average weekly earnings at the national composite level. The industry division gains ranged from 7.2% in *service* to 11.7% in *transportation, communication and other services*; the provincial increases ranged from 7.6% in *Ontario* to 12.7% in *New Brunswick*.

Dans les *manufactures*, les gains hebdomadaires moyens sont passés de \$181.67 en mai à \$182.96 en juin, alors que des augmentations ont été enregistrées dans les biens durables et non durables. Le nombre moyen d'heures hebdomadaires travaillées a baissé, passant de 39.0 à 38.8; les gains horaires moyens ont augmenté, passant de \$4.27 à \$4.31.

Dans le secteur de la *construction*, les gains hebdomadaires moyens n'ont presque pas varié entre mai et juin, des hausses dans le bâtiment ayant été compensées par des baisses dans le génie civil. Le nombre moyen d'heures hebdomadaires est passé de 39.1 à 40.2, tandis que les gains horaires moyens ont régressé de 2.8% pour s'établir à \$6.17.

Dans les *transports, communications et autres services publics*, les gains hebdomadaires moyens ont diminué de 0.5% en juin, surtout en raison de baisses dans le secteur des communications. Les gains hebdomadaires moyens dans le commerce ont augmenté de façon importante pour un deuxième mois consécutif à cause d'importantes hausses tant dans le commerce de gros que dans le commerce de détail.

Les gains hebdomadaires moyens dans les *finances, assurances et immobilier* sont passés de \$172.10 à \$172.55 en juin, des gains dans les établissements financiers ayant plus que compensé les hausses dans les assurances et immobilier. Dans les *services*, les gains hebdomadaires moyens ont augmenté de 2.3% en juin pour atteindre \$126.45, les quatre éléments ayant enregistré des progressions.

Chiffres cumulés

Emploi

La moyenne des six premiers mois de 1974, comparativement à la même période il y a un an, révèle une augmentation de 5.9% dans l'emploi au Canada pour ce qui est de l'indice synthétique industriel. Le gain le plus important s'est produit dans les services (10.0%); l'unique diminution a été observée dans le forage. Toutes les provinces ont enregistré des niveaux d'emploi plus élevés que l'année précédente, niveaux variant entre 4.8% au Québec et 9.4% en Nouvelle-Écosse.

Gains

La moyenne du premier semestre de 1974, comparée à la même période en 1973, révèle une augmentation de 8.9% dans les gains hebdomadaires moyens pour ce qui est de l'indice synthétique industriel du Canada. Les hausses enregistrées dans les divisions de l'activité économique varient entre 7.2% pour les services et 11.7% pour les transports, communications et autres services publics. Les augmentations provinciales varient entre 7.6% en Ontario et 12.7% au Nouveau-Brunswick.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice des prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant. Cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région. 4. Preliminary figures. - Nombres provisoires. 5. First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

es: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. - Les rémunérations hebdomadaires courantes ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au Catalogue. 3. This table relates to average weekly earnings of all employees. - Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.

p Preliminary figures. - Nombres provisoires.

f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1) (based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue No. 72-201, 1957-67*; Review of Man-Hours and Hourly Earnings, *Catalogue No. 72-202, 1957-67*.

1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction, highway bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, Catalogue No. 72-002, October 1971.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. Catalogue No. 72-002, February 1968.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Quebec: Transportation, communication and other utilities; Transportation.

Ontario: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue No. 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Quebec, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesaling; trade; industrial composite. Catalogue No. 72-002, February 1972.

Average Weekly Hours, Average Hourly Earnings, Average Hourly Wages of Hourly-rated Wage-earners - 1961-1967 for:

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1) (fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).

2. Gains hebdomadaires moyens.

3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).

4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).

5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *no 72-201 au catalogue, 1957-1967* Review of Man-Hours and Hourly Earnings, *no 72-202 au catalogue, 1957-1967*.

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, no 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le no 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *no 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Québec pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue No. 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue No. 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue No. 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue Nos. 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue Nos. 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue Nos. 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite.

All other series are published in the monthly issues of *Catalogue No. 72-002* for 1971, 1972 and 1973.

- (1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le no 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - no 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, no 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pour 1965 figurent dans les nos 72-201 et 72-202, au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles publiées dans les nos 72-201 et 72-202, au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les nos 72-201 et 72-202, au catalogue 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les nos 72-201 et 72-202 au catalogue 1968-1970.

C. 1971-1973:

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins, le commerce de détail, le commerce et l'ensemble des industries.

Toutes les autres séries sont publiées dans les bulletins mensuels de *Catalogue No. 72-002* pour les années 1971, 1972 et 1973.

- (1) Les numéros des publications susmentionnées renferment les données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated and present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payroll. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the calendar month. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore required to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The denominators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the reference pay periods. For employees paid at annual or monthly rates, their earnings are not affected by the number of working days in the reference period. Fixed proportions are used to reduce the earnings to a weekly basis without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deçà de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

pourcentage de l'emploi total qui est observé dépend du rapport des gr. établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total pour la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités; si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne transfère pas nécessairement d'une branche à l'autre chaque fois qu'une activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des divers groupes d'activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machine (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

non-durable goods manufacturing (non-dur) - The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), leather and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) - The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) - The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (201) and filament yarn and staple fibers (202).

ent

Employment data represent all employees on the payrolls of units in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-directors, the self-employed, unpaid family workers, persons performing non-remunerative volunteer work, pensioners, home workers, persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earning salaried employees who are paid for their services or are absent during the reference period, except for casual employees working less than seven hours in the pay period. *Regular* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of a strike or as a consequence of a strike, or those persons on strike but not paid, are not included among the employed.

ers

Wage-earners are defined by occupation rather than by the type of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse work, security staff, routemen, driver-salesmen, sales assistants, retail stores, waitresses, and working foremen performing similar to those of the employees whom they supervise, etc. Employees may be paid a fixed monthly amount or on the basis of piecework. The survey covers all wage-earners regardless of the type of payment and average weekly wages are computed for all employees. Derivations of average weekly hours and average hourly wages are based only upon data for wage-earners for whom hours are available.

Employees

Employees constitute executive, administrative, supervisory and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (201) et en filés de filaments et fibres discontinues (202).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administrateurs d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant les déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, le rendement du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de l'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements, nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux données hebdomadaires moyennes de l'ensemble des employés en compte ici. Ce système permet maintenant d'avoir des données de traitement pour tous les employés à salaire et les employés à traitement, ce qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 du méthode II du recensement des États-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire et à traitement. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire et à traitement par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures déclarées est supérieur à sept heures par semaine. À l'exception des statistiques provisoires (

primary(p); the latter are based on monthly averages.

Statistical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only preliminary aggregated figures are released in the Statistics Canada Daily News. The First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. One of these latter estimates are of higher quality than that of the first estimate of the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the final tabulations when all returns are retabulated to produce revised annual and annual averages; these data are contained in catalogue nos 72-201 and 72-202.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1970 Annual Averages(1)

Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

These percentages are exceptionally small because non-commercial services, including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont exceptionnellement petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

These percentages are smaller than might be expected as both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits que l'on pourrait s'y attendre parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Monthly ES-1A Report

EMPLOYMENT, PAYROLLS AND MANHOURS

for month of _____

Please type or use lead pencil.

Final mailing deadline is the
10th of the month. Earlier mail-
ing is appreciated.

Keep one copy for your files.

Do not write in shaded areas.

Directions are mailed separately;
extra copies are available on re-
quest.

Please make any necessary changes in above name or mailing address

1. If you had any employees drawing pay in the last period(s)
of the month indicated, please complete this report. If not, when do you expect to hire employees?

2. NUMBER OF FEMALE EMPLOYEES: (last pay period(s) in month)	Wage-earners 001	Salaried employees 002	Total females 003
			004 (omit cents)

3. TOTAL PAYROLL(S): Gross sum of all payments made at any time during the month that
constitute salaries and wages for income tax purposes (see directions) \$

4. PAYROLL DETAIL		WAGE-EARNERS (Non supervisory production, operational, maintenance, security, housekeeping, warehousing, transport, food service and similar staffs: include retail sales clerks)						SALARIED EMPLOYEE (executive, administra- tive, professional & technical, supervisory, office, clerical & related staffs)		
A. Data for the last pay period(s) in month only		Number of operating days plus paid holidays and days closed for vacations (see directions) (nearest day)		Wage-earners for whom hours data are available (include overtime hours worked)		Wage-earners for whom hours data are not available				
	Give inclusive dates	During entire pay period	During last seven days of month	Number of employees	Hours worked and hours of paid absence	Gross pay (omit cents) \$	Number of employees	Gross pay (omit cents) \$	Number of employees	Gross pay (omit cents) \$

PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, après le concept de l'établissement:

7-002 — Emploi, gains et durée du travail, Mensuel

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

7-005 — Estimations du revenu du travail, Mensuel

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

7-008 — Estimations du nombre d'employés par province et par industrie, Mensuel

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

7-201 — Review of Employment and Average Weekly Wages and Salaries, Annuel

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

7-202 — Review of Man-Hours and Hourly Earnings, Annuel

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

7-204 — Earnings and Hours of Work in Manufacturing, 1969, Annuel

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

7-206 — Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971, Annuel

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

7-202 — Labour Income, 1926-1958 — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

7-206 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1967, Annuel

7-208 — Estimations du nombre d'employés par province et industrie, 1961-1968, hors série

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

7-210 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Annuel

7-211 — Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969

7-213 — Estimations du nombre d'employés par province et par industrie, 1961-1972, hors série

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

7-211 — Gains et heures de travail au Canada: Commerce de détail, Septembre 1970

7-210 — Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 — Employment, Earnings and Hours, Monthly

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 — Estimates of Labour Income, Monthly

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 — Estimates of Employees by Province and Industry, Monthly

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annual

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 — Review of Man-Hours and Hourly Earnings, Annual

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annual

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1961 to 1969, with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 — Employment, Earnings and Hours Seasonally-adjusted Series — January 1961 — December 1971, Annual

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonally-adjusted, MCD moving average and final trend cycle).

72-502 — Labour Income, 1926-58 — Out of print, Engl.

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-506 — Labour Costs in Manufacturing, Annual, 1967.

72-508 — Estimates of Employees by Province and Industry, 1961-1968, Occasional

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 — Labour Costs in Manufacturing, Annual, 1968.

72-511 — Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.

72-513 — Estimates of employees by province and industry, 1961-1972, Occasional

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revised data for the period January 1961 to February 1971 inclusive and new data for subsequent months.

72-601 — Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970

72-610 — Labour Costs in Canada: Finance, Insurance and Real Estate, 1970

72-611 — Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970

72-612 — Labour Costs in Canada: Manufacturing, 1971

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf contraire) les colonnes laissées en blanc dans le cas des traitements et des employés à salaire indiqués séparément, signifient des données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

First Estimates(1) — August 1974

Seasonally-adjusted, the first estimate of the Canada industrial composite(2) index of employment (1961=100) showed a 1.5% rise from July to August. Decreases were recorded in all industry divisions except forestry and finance, insurance and real estate. All five regions recorded lower levels of employment than in the previous month.

Unadjusted for seasonal variations, average weekly earnings rose 1.0% in August at the Canada composite level. All industry divisions, except trade which declined, and all five regions contributed to an overall advance in the level of earnings.

Employment — (Seasonally-Adjusted)

1974

Preliminary data for July 1974 showed a rise of 0.6% in the Canada industrial composite index of employment. Gains in employment occurred in all industry divisions except mining and service, which declined.

Manufacturing employment rose 1.0% from June to July. For the most part, this increase reflected gains in transportation equipment. Seasonal layoffs in motor vehicles were substantially smaller than in previous years. Increases in wood products following the resolution of industrial disputes in British Columbia were offset by decreases in food and beverages, textile products and miscellaneous manufacturing industries.

Forestry employment rose 17.8% following the resolution of industrial disputes in British Columbia. Construction increased by 0.5% mainly reflecting gains in building. The 0.5% rise in trade and commerce was mainly in the retail component, especially food and beverage stores. Both transportation, communication and other utilities and insurance and real estate showed employment advances of 0.5% in July; the main contributors to these gains were communication and financial institutions, respectively.

Employment in service decreased by 1.0% from June to July. The decline mainly reflected reduced employment in hotels, restaurants and taverns and miscellaneous services. Mining employment was virtually no change from June to July.

In the *Atlantic Region*, the composite index of employment was no change in July. Widespread gains in employment were recorded in all divisions.

Note on Statistical Presentation under Concepts and Methods at the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

Premières estimations(1) — Août 1974

La première estimation, désaisonnalisée, de l'indice synthétique(2) de l'emploi dans les activités économiques du Canada (1961=100) fait état d'une diminution de 1.5% entre juillet et août. Toutes les divisions d'activité économique ont enregistré des diminutions, sauf le forestage, les finances, les assurances et affaires immobilières. Les cinq régions ont connu des niveaux d'emploi moins élevés que le mois précédent.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 1.0% en août au niveau de l'ensemble du Canada. Toutes les divisions d'activité économique, sauf le commerce qui a diminué, de même que toutes les régions ont participé à l'accroissement général des gains.

Emploi — (Chiffres désaisonnalisés)

Juillet 1974

Les données provisoires de juillet 1974 indiquent un accroissement de 0.6% de l'indice synthétique de l'emploi dans les activités économiques pour l'ensemble du Canada. Des augmentations d'emploi ont été observées dans toutes les divisions d'activité économique, sauf dans les mines et les services qui ont regressé.

L'emploi dans les industries manufacturières a augmenté de 1.0% de juin à juillet. La majeure partie de cette augmentation reflète des hausses dans le matériel de transport, car les mises à pied saisonnières dans l'industrie des véhicules automobiles ont été relativement plus faibles que les années précédentes. Les augmentations dans les produits du bois par suite du règlement des conflits de travail en Colombie-Britannique ont été contrebalancées par des diminutions dans les aliments et boissons, les produits du textile et les manufactures diverses.

L'emploi dans le forestage a grimpé de 17.8% par suite du règlement des conflits de travail en Colombie-Britannique. La construction s'est accrue de 1.8% surtout à cause de hausses dans le bâtiment. L'augmentation de 0.5% dans le commerce provenait surtout du commerce de détail, en particulier des magasins d'alimentation. Les transports, communications et autres services publics de même que les finances, les assurances et affaires immobilières ont accusé des augmentations de l'emploi de 0.5% en juillet; les deux principales composantes responsables de ces hausses sont les communications et les établissements financiers.

L'emploi dans les services a diminué de 1.0% de juin à juillet. Cette diminution reflète surtout une baisse de l'emploi dans les hôtels, restaurants et tavernes et dans les services divers. L'emploi dans les mines n'a pratiquement pas varié de juin à juillet.

Dans la *région de l'Atlantique*, l'indice synthétique de l'emploi n'a pas changé en juillet. Des hausses générales d'emploi ont été enregistrées dans toutes les divisions.

(1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.

(2) L'indice synthétique industriel s'applique à l'ensemble des activités économiques, sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours de n'importe quel mois de l'année.

reported in retail trade, in logging and in metals mining. Offsetting declines occurred in hotels, restaurants and taverns, building construction and wood products.

The *Quebec* composite index showed a slight increase from June to July. There were increases in employment in transportation equipment, logging, retail trade and financial institutions. These gains were for the most part offset by declines in food and beverages, textile products, transportation, non-metals mining and hotels, restaurants and taverns.

In *Ontario*, the industrial composite employment index jumped 1.2% in July. The greatest portion of this gain was in manufacturing and mainly reflected increases in motor vehicles following substantially smaller-than-usual seasonal layoffs. Increases were also recorded in communication, utilities, food stores and financial institutions. Somewhat offsetting declines occurred in miscellaneous and recreational services.

The industrial composite employment index for the *Prairie Region* rose 0.6% in July reflecting increases in all three provinces. The resolution of industrial disputes in slaughtering and meat processing and in building construction contributed considerably to the overall advance. Additional increases in communication, wholesale trade and retail trade were countered by declines in hotels, restaurants and taverns and business services.

In *British Columbia*, the industrial composite index leaped 3.3% following the resolution of industrial disputes in logging, wood products, building and engineering. Declines in employment in mining and service reflected industrial disputes in metals and reductions in hotels, restaurants and taverns, respectively.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 2.0% in July at the Canada industrial composite level. Gains were recorded in all industry divisions and in all provinces.

Unadjusted for seasonal variations, average weekly earnings at the Canada industrial composite level rose 1.5% to \$178.73 in July. All provinces and all industry divisions contributed to the overall rise in the level of earnings.

In *forestry*, average weekly earnings rose 6.9% mainly reflecting the resolution of industrial disputes in British Columbia.

Average weekly earnings in *mining* showed almost no change from June to July. Gains in non-metals and mining services were offset by declines in metals and mineral fuels. Average weekly hours of hourly-rated wage-earners declined to 39.5 from 39.9 in the previous month. Average hourly earnings rose 3 cents to \$5.48.

dans le commerce de détail, l'exploitation forestière et les mines non métalliques. D'autre part, on a observé des baisses de l'emploi dans les hôtels, restaurants et tavernes, le bâtiment et les produits du bois.

L'indice synthétique de l'emploi du *Québec* a légèrement augmenté de juin à juillet. Il y a eu des augmentations d'emploi dans le matériel de transport, l'exploitation forestière, le commerce de détail et les établissements financiers. Ces hausses ont été en grande partie contrebalancées par des baisses dans les aliments et boissons, les produits du textile, les transports, les mines non métalliques et les hôtels, restaurants et tavernes.

En *Ontario*, l'indice synthétique de l'emploi dans les activités économiques s'est accru de 1.2% en juillet. La majeure partie de la hausse est survenue dans les industries manufacturières et reflétait des augmentations dans la fabrication des véhicules automobiles par rapport aux mises à pied saisonnières beaucoup plus faibles qu'à l'accoutumée. Des augmentations ont également été enregistrées dans les communications, les services, les magasins d'alimentation et les établissements financiers. Des diminutions survenues dans les services divers et récréatifs ont quelque peu contrebalancé ces augmentations.

L'indice synthétique de l'emploi dans les activités économiques de la *région des Prairies* a augmenté de 0.6% en juillet reflétant des augmentations dans les trois provinces. Le règlement des conflits de travail, l'abattage et la préparation de la viande de bœuf ont contribué grandement à l'accroissement général de l'emploi. Des augmentations dans les communications, le commerce de gros et le commerce de détail ont perdu de leur valeur à cause de diminutions dans les hôtels, restaurants et tavernes de même que dans les services fouris aux entreprises.

En *Colombie-Britannique*, l'indice synthétique de l'emploi dans les activités économiques a grimpé de 3.3% par suite du règlement des conflits de travail dans l'exploitation forestière, les produits du bois, le bâtiment et le génie civil. Les diminutions de l'emploi dans les mines et les services reflétaient des conflits de travail dans les mines métalliques et des diminutions dans les hôtels, restaurants et tavernes.

Gains et heures de travail

Les gains hebdomadaires moyens *désaisonnalisés* au niveau de l'ensemble des activités économiques pour le Canada ont augmenté de 2.0% en juillet. Ils se sont accrues dans toutes les divisions d'activités économiques et dans toutes les provinces.

Les gains hebdomadaires moyens *non désaisonnalisés* au niveau de l'ensemble des activités économiques pour le Canada ont augmenté de 1.5%, atteignant \$178.73 en juillet. Toutes les provinces et toutes les divisions d'activité économique ont participé à l'accroissement général du niveau des gains.

Dans le *forêtage*, les gains hebdomadaires moyens ont augmenté de 6.9%, surtout par suite du règlement des conflits de travail en Colombie-Britannique.

Les gains hebdomadaires moyens dans les *mines* n'ont pas varié de juin à juillet. Les hausses dans les mines non métalliques et dans les services miniers ont été contrebalancées par des baisses dans les mines métalliques et les combustibles minéraux. Le nombre d'heures hebdomadaires des employés payés à l'heure a régressé, passant de 39.9 (le mois précédent) à 39.5. Les gains horaires moyens ont augmenté de 3 cents pour atteindre \$5.48.

In *manufacturing*, average weekly earnings rose 0.6%. This reflected gains in non-durables as the durables component had no change over the month. Average weekly hours dropped 9.0 in June to 38.4 in July, while average hourly earnings rose \$4.30 to \$4.36.

Average weekly earnings in *construction* jumped 2.1% in July reflecting increases in both building and engineering. Average weekly earnings rose to 40.6 mainly reflecting gains in engineering. Average hourly earnings showed a 10 cent rise reflecting increases in both building and engineering.

In *transportation, communication and other utilities*, average weekly earnings increased 2.1% to \$203.14 mainly reflecting gains in transportation and communication. Average weekly earnings in *trade* rose from \$141.72 in June to \$144.13 in July mainly due to gains in the *retail trade* component, especially department stores.

Average weekly earnings in *finance, insurance and real estate* rose 0.5% in July as declines in financial institutions were more than offset by gains in insurance and real estate. The 0.5% rise in average weekly earnings in *service* reflected gains in all four components.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont augmenté de 0.6%. Cette augmentation reflétait des hausses dans les biens non durables alors que les biens durables n'ont pas varié au cours du mois. Le nombre moyen d'heures hebdomadaires a régressé, passant de 39.0 en juin à 38.4 en juillet, tandis que les gains horaires moyens sont passés de \$4.30 à \$4.36.

Les gains hebdomadaires moyens dans le secteur de la *construction* ont grimpé de 2.1% en juillet reflétant des augmentations dans le bâtiment et le génie civil. Le nombre moyen d'heures hebdomadaires est monté à 40.6 surtout à cause de hausses dans le génie civil. Les gains horaires moyens ont connu une augmentation de 10 cents, traduisant des augmentations dans les deux composantes.

Dans les *transports, communications et autres services publics*, les gains hebdomadaires moyens ont augmenté de 2.1% pour atteindre \$203.14, surtout à cause de hausses dans les transports et les communications. Les gains hebdomadaires moyens dans le *commerce* sont passés de \$141.72 en juin à \$144.13 en juillet, surtout en raison de hausses dans le commerce de détail, en particulier dans les magasins à rayons.

Les gains hebdomadaires moyens dans les *finances, assurances et affaires immobilières* ont augmenté de 1.0% en juillet car les diminutions dans les établissements financiers ont été plus que contrebalancées par les hausses dans les assurances et les affaires immobilières. La hausse de 0.5% des gains hebdomadaires moyens des *services* reflétait des augmentations dans les quatre composantes.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice de prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région. p Preliminary figures. - Nombres provisoires. f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

TABLE 10. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1) (based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue No. 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue No. 72-202, 1957-67*.

1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction, highway bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, Catalogue No. 72-002, October 1971.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. Catalogue No. 72-002, February 1968.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue No. 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; industrial composite. Catalogue No. 72-002, February 1972.

Average Weekly Hours, Average Hourly Earnings, Average Hourly Wages of Hourly-rated Wage-earners - 1961-1967 for:

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1) (fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *no 72-201 au catalogue, 1957-1967* Review of Man-Hours and Hourly Earnings, *no 72-202 au catalogue, 1957-1967*.

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, no 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le no 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Écosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *no 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue No. 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Québec - for highway and bridge maintenance - *Catalogue No. 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue No. 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue Nos. 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue Nos. 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue Nos. 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite.

All other series are published in the monthly issues of *Catalogue No. 72-002* for 1971, 1972 and 1973.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le no 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - no 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, no 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pour 1965 figurent dans les nos 72-201 et 72-202, au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles publiées dans les nos 72-201 et 72-202, au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les nos 72-201 et 72-202, au catalogue 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les nos 72-201 et 72-202, au catalogue 1968-1970.

C. 1971-1973:

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada - Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins, le commerce de détail, le commerce et l'ensemble des industries.

Toutes les autres séries sont publiées dans les bulletins mensuels no 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated and presented in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit. Although not capable of reporting all basic statistics, it can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer employees.

Reference Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore asked to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the data are reduced to one week's proportion of the totals. The denominators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the pay periods. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the pay period. Fixed proportions are used to reduce the earnings to a weekly basis without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

pourcentage de l'emploi total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi qu'à d'autres enquêtes supplémentaires. Des estimations du nombre d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machine (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des produits électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404.421) - The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) - The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of operating units in the reference period. The employee concept excludes self-owners or partners in unincorporated businesses, non-managing directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are in paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular employees* are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on unpaid leave, are not included among the employed.

Earners

Wage-earners are defined by occupation rather than by the mode of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing similar to those of the employees whom they supervise, etc. *Wage-earners* may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the mode of payment and average weekly wages are computed for all. For *hourly earners*, derivations of average weekly hours and average hourly wages are based only upon data for wage-earners for whom hours are available.

Employees

Salaried employees constitute executive, administrative, super-technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livriers, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administrateurs d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant les déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux données hebdomadaires moyennes de l'ensemble des employés à rémunération en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement. Jusqu'au 1er mars 1971, on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des États-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire et à traitement fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures déclarées. À remarquer que le nombre total d'heures comprend les heures

les part-time wage-earners and casuals working more than seven during one week. Annual statistics are calculated from the gate of the monthly data, with the exception of those shown as binary(p); the latter are based on monthly averages.

tical Presentation

Each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for st, most current month, are entitled first estimates. They are on a limited number of returns (usually about 50%) and only aggregated figures are released in the Statistics Canada Daily ne First Estimates table of this publication. Simultaneously, estimates are prepared for the month immediately preceding ost current data and third estimates for the month prior to that. f these latter estimates are of higher quality than that of the first e of the higher rate of returns (typically, 65 and 75%, respec- Consequently full details for both months are shown within blication.

After completion of the third estimate, further revisions to the e made to incorporate late returns and corrected information d from our respondents or to rectify mechanical errors. Larger ons are calculated immediately and appear in the historical al tables and in column for the previous year in tables 2, 3 f this publication. The smaller corrections are completed in the tabulations when all returns are retabulated to produce revised and annual averages; these data are contained in catalogue nos and 72-202.

supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Monthly ES-1A Report

EMPLOYMENT, PAYROLLS AND MANHOURS

for month of _____

Please type or use lead pencil.

Final mailing deadline is the
10th of the month. Earlier mail-
ing is appreciated.

Keep one copy for your files.

Do not write in shaded areas.

Directions are mailed separately;
extra copies are available on re-
quest.

Please make any necessary changes in above name or mailing address

1. If you had any employees drawing pay in the last period(s)

of the month indicated, please complete this report. If not, when do you expect to hire employees?

2. NUMBER OF FEMALE EMPLOYEES: (last pay period(s)
in month)Wage-earners
001Salaried employees
002Total females
003

004 (omit cents)

3. TOTAL PAYROLL(S): Gross sum of all payments made at any time during the month that
constitute salaries and wages for income tax purposes (see directions) \$

4. PAYROLL DETAIL

WAGE-EARNERS (Non supervisory production, operational, maintenance, security, housekeeping,
warehousing, transport, food service and similar staffs: include retail sales clerks)SALARIED EMPLOYEES
(executive, administra-
tive, professional &
technical, supervisory,
office, clerical
& related staffs)A. Data for the
last pay period(s)

PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, sous le concept de l'établissement:

2 — Emploi, gains et durée du travail, Mensuel

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

5 — Estimations du revenu du travail, Mensuel

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

8 — Estimations du nombre d'employés par province et par industrie, Mensuel

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

— Review of Employment and Average Weekly Wages and Salaries, Annuel

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

— Review of Man-Hours and Hourly Earnings, Annuel

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

— Earnings and Hours of Work in Manufacturing, 1969, Annuel

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

— Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971, Annuel

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

— Labour Income, 1926-1958 — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

— Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1967, Annuel

— Estimations du nombre d'employés par province et industrie, 1961-1968, hors série

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

— Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Annuel

— Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969

— Estimations du nombre d'employés par province et par industrie, 1961-1972, hors série

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

— Gains et heures de travail au Canada: Commerce de détail, Septembre 1970

— Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970

— Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970

— Coûts de la main-d'oeuvre au Canada: industrie manufacturière, 1971

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 — **Employment, Earnings and Hours, Monthly**

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 — **Estimates of Labour Income, Monthly**

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 — **Estimates of Employees by Province and Industry, Monthly**

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 — **Review of Employment and Average Weekly Wages and Salaries, Annual**

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 — **Review of Man-Hours and Hourly Earnings, Annual**

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 — **Earnings and Hours of Work in Manufacturing, 1969, Annual**

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1961 to 1969, with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 — **Employment, Earnings and Hours Seasonally-adjusted Series — January 1961 — December 1971, Annual**

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonally-adjusted, MCD moving average and final trend cycle).

72-502 — **Labour Income, 1926-58 — Out of print, Engl.**

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of methods and concepts).

72-506 — **Labour Costs in Manufacturing, Annual, 1967.**

72-508 — **Estimates of Employees by Province and Industry, 1961-1968, Occasional**

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 — **Labour Costs in Manufacturing, Annual, 1968.**

72-511 — **Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.**

72-513 — **Estimates of employees by province and industry, 1961-1972, Occasional**

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revisions for the period January 1961 to February 1971 inclusive and new data for subsequent months.

72-601 — **Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970**

72-610 — **Labour Costs in Canada: Finance, Insurance and Real Estate, 1970**

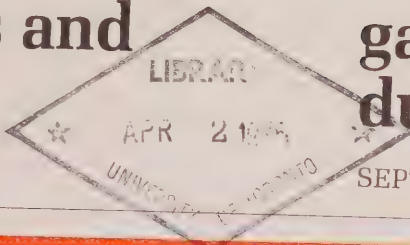

72-611 — **Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970**

72-612 — **Labour Costs in Canada: Manufacturing, 1971**

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés à traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

First Estimates(1) - September 1974

Seasonally-adjusted, the first estimate of the Canada industrial composite(2) index of employment (1961=100) showed a 0.1% rise from August to September. Gains in forestry, mining, construction and service were offset by declines in the remaining industry divisions. Employment in Quebec declined over the month, British Columbia showed no change, the remaining regions showed increases.

Unadjusted for seasonal variations, average weekly earnings in Canada composite level rose 1.8% in September. Gains were recorded in forestry, mining, manufacturing, construction and transportation, communication and other utilities. All five regions contributed to the overall advance in the level of earnings.

Employment - (Seasonally-Adjusted)

Preliminary Data(1) - August 1974

Preliminary data for August 1974 showed a drop of 1.5% in the Canada industrial composite index of employment. Declines were recorded in all industry divisions except forestry and finance, insurance and real estate, which increased.

Manufacturing employment dropped 2.1% from July to August. The largest element of this decline was the decrease in motor vehicles following an unusual gain in the previous month, when layoffs were substantially smaller than normal. In addition, there were widespread decreases in many elements of both durables and non-durables. Employment in transportation, communication and utilities fell 1.8% in August. Industrial disputes in urban transit and decreases in water transport and services, railway transport and air transport were responsible for the most part of this decline.

Service employment fell 0.6% as declines in recreational and miscellaneous outweighed gains in business. In trade, the 0.2% decline in employment from July to August largely reflected declines in retail trade. The 0.9% drop in mining employment was mainly in coal, while the slight decrease in construction employment was in the building component. The 0.8% increase in forestry employment was largely in the logging sector. Finance, insurance and real estate rose fractionally following gains in both components.

(1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.

(2) The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

Premières estimations(1) - Septembre 1974

Après désaisonnalisation, la première estimation de l'indice synthétique industriel (2) de l'emploi dans les activités économiques du Canada (1961=100) fait état d'une baisse de 0.1% entre août et septembre. Les augmentations dans le forestage, les mines, la construction et les services ont été neutralisées par des baisses dans toutes les autres divisions de l'activité économique. Au cours du mois, l'emploi a diminué au Québec, il est demeuré inchangé en Colombie-Britannique et a augmenté dans les autres régions.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 1.8% en septembre au niveau de l'ensemble des activités économiques du Canada. Des augmentations ont été enregistrées dans le forestage, les mines, les manufactures, la construction, et les transports, communications et autres services publics. Les cinq régions ont contribué à l'augmentation générale des gains.

Emploi - (chiffres désaisonnalisés)

Données provisoires(1) - Août 1974

Les données provisoires d'août 1974 indiquent une baisse de 1.5% de l'indice synthétique industriel de l'emploi dans les activités économiques pour l'ensemble du Canada. Des baisses ont été enregistrées dans toutes les divisions de l'activité économique sauf le forestage et les finances, assurances et affaires immobilières qui ont enregistré des augmentations.

L'emploi dans les manufactures a baissé de 2.1% de juillet à août en raison surtout d'une baisse dans le secteur des véhicules automobiles après la hausse exceptionnelle enregistrée le mois précédent lorsque le nombre de congédiements saisonniers était considérablement inférieur à la normale. On a en outre observé des baisses généralisées dans bon nombre d'éléments des biens durables et non durables. L'emploi a diminué de 1.8% en août dans les transports, communications et autres services publics. La plus grande partie de cette baisse était attribuable aux conflits du travail dans les transports urbains et aux diminutions dans les transports par eau et services ainsi que dans les transports ferroviaires et par camion.

L'emploi dans les services a baissé de 0.6%, les diminutions dans les services récréatifs et les services divers ayant dépassé les augmentations dans les services extérieurs des entreprises. L'emploi dans le commerce a diminué de 0.2% entre juillet et août, surtout en raison des diminutions dans le commerce de détail. La diminution de 0.9% de l'emploi dans les mines s'est surtout fait sentir dans les mines de métaux et la légère baisse de l'emploi dans la construction s'est surtout manifestée dans le bâtiment. L'augmentation de 0.8% de l'emploi dans le forestage s'est surtout manifestée dans le secteur de l'abattage. Le secteur des finances, assurances et immobilier a augmenté partiellement à la suite de gains dans les deux éléments.

(1) Voir Présentation statistique, sous Concepts et méthodes, à la fin de la présente publication.

(2) L'ensemble des activités économiques comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et le bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours d'un mois quelconque de l'année.

In the *Atlantic Region*, the composite employment index fell 0.5% in August. Decreases in Newfoundland, Prince Edward Island and New Brunswick outweighed gains in Nova Scotia. Employment declined substantially in fish products and retail trade; somewhat offsetting gains were recorded in hotels, restaurants and taverns.

The *Quebec* composite employment index fell 1.6% from July to August. There were declines in employment in transportation equipment, food and beverages, textile products, urban transit, water transport and services, department stores, miscellaneous services and metal mining. The rise in construction employment was mainly in the building component.

In *Ontario*, the composite index of employment dropped 1.5% in August. The greatest portion of this decline was in manufacturing and mainly reflected decreases in motor vehicles following an unusual gain the previous month due to substantially smaller-than-usual seasonal layoffs. In addition, decreases were recorded in urban transit, hotels, restaurants and taverns, building construction and metals mining.

The industrial composite employment index for the *Prairie Region* decreased 0.6% in August as declines were recorded in all three provinces. Employment reduced in both durables and non-durables, building construction, railway transport and hotels, restaurants and taverns. A somewhat offsetting gain was recorded in department stores.

In *British Columbia*, the industrial composite index fell 0.8% from July to August. Declines in employment in wood products, miscellaneous services, building construction and metals mining were somewhat offset by gains in fish products, storage and wholesale trade.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 0.6% in August at the Canada industrial composite level. Gains were recorded in all industry divisions except construction and transportation, communication and other utilities. All provinces except Nova Scotia and Quebec contributed to the overall rise in the level of earnings.

Unadjusted for seasonal variations, average weekly earnings at the Canada composite level rose 0.5% to \$180.91 in August. All industry divisions except transportation, communication and other utilities and trade, and all provinces except Nova Scotia and Quebec participated in the overall rise in the level of earnings.

In *forestry*, average weekly earnings rose 2.5% mainly reflecting increased hourly earnings in Quebec and British Columbia.

Average weekly earnings in *mining* rose 2.5% from July to August mainly reflecting gains in metals and mineral fuels. Average weekly hours of hourly-rated wage-earners rose from 39.4 to 39.8 while average hourly earnings climbed 9 cents to \$5.61. The increase in hours worked was mainly in metals; all components recorded gains in hourly earnings.

Dans la *région de l'Atlantique*, l'indice synthétique industriel de l'emploi est tombé de 0.5% en août, les diminutions enregistrées en Terre-Neuve, dans l'Île-du-Prince-Édouard et au Nouveau-Brunswick ayant dépassé les augmentations enregistrées en Nouvelle-Écosse. L'emploi a considérablement baissé dans les produits du poisson et le commerce de détail; ces baisses ont été quelque peu compensées par des augmentations dans les hôtels, restaurants et tavernes.

Au *Québec*, l'indice synthétique industriel de l'emploi est tombé de 1.6% entre juillet et août. On a observé des diminutions de l'emploi dans le matériel de transport, les aliments et boissons, les produits du textile, les transports urbains, les transports par eau et services, les magasins à rayons, les services divers et les mines de métaux. La hausse de l'emploi dans la construction était surtout concentrée dans le secteur du bâtiment.

En *Ontario*, l'indice synthétique industriel de l'emploi est tombé de 1.5% en août. Cette baisse, qui se situait surtout dans les industries manufacturières, reflétait essentiellement une diminution dans les produits des véhicules automobiles qui a suivi une hausse exceptionnelle le mois précédent due surtout à la réduction du nombre habituel de congédiés saisonniers. De plus, on a enregistré des diminutions dans les transports urbains, les hôtels, restaurants et tavernes, le bâtiment et les mines de métaux.

L'indice synthétique industriel de l'emploi dans la *région des Prairies* a baissé de 0.6% en août, les trois provinces ayant toutes enregistré des diminutions. L'emploi a baissé à la fois dans les biens durables et non durables, dans le transport ferroviaire et les hôtels, restaurants et tavernes. Ces baisses ont été quelque peu compensées par la hausse enregistrée dans les magasins à rayons.

En *Colombie-Britannique*, l'indice synthétique industriel de l'emploi a baissé de 0.8% entre juillet et août. Les diminutions de l'emploi dans les produits du bois, les services divers, le bâtiment et les mines de métaux ont été quelque peu neutralisées par des augmentations dans les produits du poisson, l'entreposage et le commerce de gros.

Gains et heures de travail

Les gains hebdomadaires moyens *désaisonnalisés* au niveau de l'ensemble des activités économiques du Canada ont augmenté de 0.6% entre juillet et août. Des augmentations ont été enregistrées dans toutes les divisions de l'activité économique sauf dans la construction et les transports, communications et autres services publics. Toutes les provinces, à l'exception de la Nouvelle-Écosse et du Québec, ont participé à l'augmentation générale du niveau des gains.

Les gains hebdomadaires moyens *non désaisonnalisés* ont augmenté de 0.5% en août, atteignant \$180.91, au niveau de l'ensemble des activités économiques du Canada. Toutes les divisions de l'activité économique ont participé à l'augmentation, à l'exception des transports, communications et autres services publics et le commerce de gros, toutes les provinces, sauf la Nouvelle-Écosse et le Québec, ont participé à l'augmentation générale du niveau des gains.

Dans le *forestage*, les gains hebdomadaires moyens ont augmenté de 2.5%, en raison surtout de l'augmentation des gains horaires au Québec et en Colombie-Britannique.

Les gains hebdomadaires moyens dans les *mines* ont augmenté de 2.5% de juillet à août à la suite surtout d'augmentations dans les mines de métaux et les combustibles minéraux. Le nombre moyen d'heures hebdomadaires travaillées par des ouvriers payés à l'heure a augmenté, passant de 39.4 à 39.8, tandis que les gains horaires moyens ont monté de \$5.56 à \$5.61 pour atteindre \$5.61. L'augmentation dans les heures travaillées était surtout concentrée dans les mines de métaux; tous les éléments ont enregistré des augmentations dans les gains horaires.

In *manufacturing*, average weekly earnings rose 1.1%. This increase mainly reflected gains in the durables component as non-durables showed little change over the month. Average weekly hours rose to 38.7 from 38.4, while average hourly earnings increased from \$3.9 in July to \$4.43 in August.

Average weekly earnings in *construction* rose from \$254.81 in July to \$257.62 in August mainly due to increases in the engineering component. Average weekly hours decreased slightly as declines in manufacturing more than offset gains in engineering. Average hourly earnings rose 1.6% from July to August reflecting widespread increases in both components.

Declines in average weekly earnings were recorded in both *transportation, communication and other utilities and trade* in August. A 0.1% decrease in the former largely reflected losses in the transportation component, while the 0.3% decline in the latter was the result of decreases in retail trade.

Average weekly earnings in *finance, insurance and real estate* rose fractionally in August as gains in financial institutions outweighed losses in insurance and real estate. The 0.2% rise in average weekly earnings in *service* reflected widespread gains in all components.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont augmenté de 1.1% surtout en raison d'augmentations dans les biens durables, les biens non durables n'ayant que très peu varié au cours du mois. Le nombre moyen d'heures hebdomadaires travaillées a augmenté, passant de 38.4 à 38.7 et les gains horaires moyens ont progressé, passant de \$4.39 en juillet à \$4.43 en août.

Les gains hebdomadaires moyens ont augmenté dans le secteur de la *construction*, passant de \$254.81 en juillet à \$257.62 en août, en raison surtout de hausses dans le génie civil. Le nombre moyen d'heures hebdomadaires a légèrement baissé, les hausses dans le génie civil ayant été absorbées par des baisses dans le bâtiment. Les gains horaires moyens ont progressé de 1.6% entre juillet et août en raison d'augmentations généralisées dans les deux éléments.

Dans les *transports, communications et autres services publics et le commerce*, les gains hebdomadaires moyens ont régressé en août. La baisse de 1.0% enregistrée dans le premier secteur est principalement attribuable aux baisses dans les transports tandis que la baisse de 0.3% observée dans le second est due à des baisses dans le commerce de détail.

Les gains hebdomadaires moyens dans les *finances, les assurances et l'immeuble* ont partiellement augmenté en août, les gains dans les établissements financiers ayant compensé les baisses dans les assurances et l'immeuble. Les gains hebdomadaires moyens ont augmenté de 0.2% dans les *services* à la suite de progressions dans tous les éléments.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are paid. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice des prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc corrigée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant. 2. For Consumer Price Index construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Pour les méthodes de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data on this table relate to average weekly wages of hourly-paid wage-earners only. Although this statistic is no longer calculated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à cet effet au vue de l'usage de ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région. 4. Preliminary figures. - Données préliminaires. 5. First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Notes: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. - Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au Catalogue. 3. This table relates to average weekly earnings of all employees. - Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.

p Preliminary figures. - Nombres provisoires.

f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

STATISTICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)

(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue 72-002, October 1971*.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Quebec, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale and retail trade; industrial composite. *Catalogue 72-002, February 1972*.

Some of the issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)

(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).

2. Gains hebdomadaires moyens.

3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).

4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).

5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967*; Review of Man-Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours*, n° 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n° 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Écosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Québec, pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, Catalogue 72-002 July 1974.

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, communication and other utilities and industrial composite. Catalogue 72-002 September 1974.

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. Catalogue 72-002 September 1974.

All other series are published in the monthly issues of *Catalogue 72-002 for 1971, 1972 and 1973.*

Heures hebdomadaires moyennes, Rémunération horaire moy. Gains hebdomadaires moyens des employés à salaire (heures déclarées 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Heures hebdomadaires moyennes, rémunération horaire moy. gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n° 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n° 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pour 1965 figurent dans les n°s 72-201 et 72-202, au catalogue, 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles publiées dans les n°s 72-201 et 72-202, au catalogue, 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202, au catalogue 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202, au catalogue 1968-1970.

C. 1971-1973:

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre d'employés, rémunération hebdomadaire moyenne des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées) de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et des ponts, transports, communication et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue, septembre 1974.

Nombre d'employés à traitement, ensemble des employés à salaire employés à salaire (heures déclarées), rémunération hebdomadaire moyenne des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et des ponts. Voir le n° 72-002 au catalogue, septembre 1974.

Toutes les autres séries sont publiées dans les bulletins mensuels n° 72-002 au catalogue pour les années 1971, 1972 et 1973.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects data on employment, earnings and hours which are tabulated in the data in this report. Data which, prior to March 1971, published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods of the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "mark-up" or "gross profit" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. For all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer employees.

Reference Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore required to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the data are reduced to one week's proportion of the totals. The factors of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The factors of the fractions are the number of working days in the pay periods. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the pay period. Proportions are used to reduce the earnings to a weekly basis without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in a month that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household services, public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

pourcentage de l'emploi total qui est observé dépend du rapport des établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un lieu (selon la définition établie par le recensement de la population) et, où applicable, à une région urbaine. Les données de Terre-Neuve, du Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont regroupées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total pour la région des Prairies. On a retenu la définition de "région métropolitaine" pour les dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions urbaines incluent généralement le territoire avoisinant avec le centre urbain. On peut sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, les payrolls et le revenu du travail. Les unités de déclaration non situées dans une région urbaine tabulée sont comprises dans les totaux régionaux, provinciaux et nationaux.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement est engagé dans un nombre de plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou, si cela n'est pas possible, par les recettes brutes au titre de ces activités. Si un établissement exerce des activités très diverses, son activité principale n'est pas nécessairement transférée d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la CTI" des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble des produits du bois (C.T.I. 250-259), de l'industrie des métaux et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la mécanique (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des produits électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) - The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) - The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of operating units in the reference period. The employee concept excludes sole proprietors or partners in unincorporated businesses, non-executive directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earning and salaried employees who are paid for their services or are paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular employees* are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on strike without pay, are not included among the employed.

Earners

Wage-earners are defined by occupation rather than by the mode of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse delivery staffs, security staff, routemen, driver-salesmen, sales staff in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the mode of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly wages are based only upon data for wage-earners for whom hours are available.

Employees

Salaried employees constitute executive, administrative, super-technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Génie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes, les primes de vie chère et autres gratifications régulières, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de l'oeuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnités d'accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements de nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains bruts des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés en compte ici. Ce système permet maintenant d'avoir des données séparées pour tous les employés à salaire et les employés à traitement, qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus en n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des États-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent moins de sept heures par semaine. À l'exception des statistiques provisoires

liminary(p); the latter are based on monthly averages.

Statistical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only preliminary aggregated figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, preliminary estimates are prepared for the month immediately preceding most current data and third estimates for the month prior to that. Of these latter estimates are of higher quality than that of the first estimate of the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the final tabulations when all returns are retabulated to produce revised monthly and annual averages; these data are contained in catalogue nos 72-1 and 72-202.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1970 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1970(1)

Composite(3) - Ensemble.....	19.2	15.1	8.9	11.8	10.4	16.7	21.3	21.1	11.8	21.6	22.7
Industries(3).....	56.7	54.9	38.6	48.0	52.5	57.4	59.9	58.3	43.0	51.2	55.2

Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

These percentages are exceptionally small because non-commercial services, including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont exceptionnellement petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé religieuse, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

These percentages are smaller than might be expected as both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits que l'on pourrait s'y attendre parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 — **Emploi, gains et durée du travail, Mensuel**

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques, graphiques et notes explicatives).

2-005 — **Estimations du revenu du travail, Mensuel**

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

2-008 — **Estimations du nombre d'employés par province et par industrie, Mensuel**

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

2-201 — **Review of Employment and Average Weekly Wages and Salaries, Annuel**

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

2-202 — **Review of Man-Hours and Hourly Earnings, Annuel**

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

2-204 — **Earnings and Hours of Work in Manufacturing, 1969, Annuel**

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région: graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

2-206 — **Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971, Annuel**

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes, non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

502 — **Labour Income, 1926-1958 — épuisé, Angl.**

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

06 — **Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1967, Annuel**

08 — **Estimations du nombre d'employés par province et industrie, 1961-1968, hors série**

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

10 — **Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Annuel**

11 — **Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969**

13 — **Estimations du nombre d'employés par province et par industrie, 1961-1972, hors série**

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

1 — **Gains et heures de travail au Canada: Commerce de détail, Septembre 1970**

0 — **Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970**

— **Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970**

— **Coûts de la main-d'oeuvre au Canada: industrie manufacturière, 1971**

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 — Employment, Earnings and Hours, Monthly

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 — Estimates of Labour Income, Monthly

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 — Estimates of Employees by Province and Industry, Monthly

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annual

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 — Review of Man-Hours and Hourly Earnings, Annual

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annual

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1961 to 1969, with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 — Employment, Earnings and Hours Seasonally-adjusted Series — January 1961 — December 1971, Annual

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonally-adjusted, MCD moving average and final trend cycle).

72-502 — Labour Income, 1926-58 — Out of print, Engl.

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-506 — Labour Costs in Manufacturing, Annual, 1967.

72-508 — Estimates of Employees by Province and Industry, 1961-1968, Occasional

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 — Labour Costs in Manufacturing, Annual, 1968.

72-511 — Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.

72-513 — Estimates of employees by province and industry, 1961-1972, Occasional

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revised data for the period January 1961 to February 1971 inclusive and new data for subsequent months.

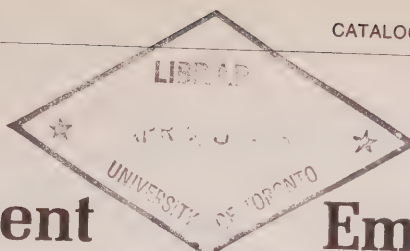

72-601 — Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970

72-610 — Labour Costs in Canada: Finance, Insurance and Real Estate, 1970

72-611 — Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970

72-612 — Labour Costs in Canada: Manufacturing, 1971

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf in contraire) les colonnes laissées en blanc dans le cas des emp traitement et des employés à salaire indiqués séparément, signifient données relatives aux employés pour lesquels les heures sont enregis sont pas disponibles.

First Estimate(1) – October 1974

Seasonally-adjusted, the first estimate of the Canada industrial (2) index of employment (1961=100) showed a 0.1% rise September to October. Gains in forestry, finance, insurance and state, and service offset declines in the remaining industry regions. Increased employment was recorded in Ontario and the Region; the remaining regions showed decreases.

Unadjusted for seasonal variations, average weekly earnings 8% at the Canada composite level in October. All industry regions and all five regions contributed to the overall advance in the earnings.

Preliminary Data(1) – September 1974

Employment – (Seasonally-Adjusted)

Preliminary data for September 1974 showed a rise of 0.6% in Canada industrial composite index of employment. Increases were recorded in all industry divisions except manufacturing, which

increases in employment in transportation, communication services and utilities and in service accounted for some two-thirds of the growth. The former advanced 1.4% following the resolution of disputes in urban transit plus gains in water transport and highway and bridge maintenance; there was a somewhat decline in the communication component owing to disputes in telephone. Service increased by 1.5% as gains in recreational and miscellaneous more than offset declines in

employment in trade rose 0.4% mainly reflecting widespread gains in the retail component. Finance, insurance and real estate rose 0.2% as the gains in financial institutions were larger than gains in insurance and real estate. The 0.4% rise in mining was mainly reflected gains in metals, while the 0.3% rise in construction was largely in the engineering component. Forestry showed almost no change over the month as British Columbia offset Atlantic region advances. Manufacturing employment mainly reflecting declines in durable goods.

Note on Statistical Presentation under Concepts and Methods at the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, state households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

Premières estimations(1) – Octobre 1974

Après désaisonnalisation, la première estimation de l'indice synthétique(2) de l'emploi dans les activités économiques du Canada (1961=100) fait état d'une hausse de 0.1% entre septembre et octobre. Des augmentations dans le forçage, les finances, les assurances et l'immeuble, et les services ont compensé les baisses enregistrées dans les autres divisions de l'activité économique. L'emploi a augmenté en Ontario et dans la région des Prairies et il a diminué dans les autres régions.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 1.8% en octobre au niveau de l'ensemble des activités économiques du Canada. Toutes les divisions de l'activité économique et les cinq régions ont contribué à l'augmentation générale des gains.

Données provisoires(1) – Septembre 1974

Emploi – (chiffres désaisonnalisés)

Les données provisoires de septembre 1974 indiquent une hausse de 0.6% de l'indice synthétique de l'emploi dans les activités économiques pour l'ensemble du Canada. Des hausses ont été enregistrées dans toutes les divisions de l'activité économique sauf les manufactures qui ont enregistré une baisse.

Les augmentations de l'emploi dans les transports, communications et autres services publics, et dans les services étaient responsables des deux tiers de l'augmentation générale. Dans le secteur des transports, communications et autres services publics, l'emploi a progressé de 1.4% à la suite du règlement des conflits du travail dans les transports urbains et d'augmentations dans les transports par eau et services et l'entretien de routes et ponts; ces augmentations ont été quelque peu neutralisées par une baisse dans l'élément des communications attribuable aux conflits du travail dans les services du téléphone. Dans le secteur des services, l'emploi a augmenté de 1.5%, les gains enregistrés dans les services extérieurs des entreprises, les services récréatifs et les services divers ayant dépassé les baisses dans les services personnels.

L'emploi dans le commerce a augmenté de 0.4% surtout en raison de gains généralisés dans le commerce de détail. L'emploi dans les finances, les assurances et l'immeuble a augmenté de 0.2%, les augmentations dans les établissements financiers ayant dépassé les baisses dans les assurances et l'immeuble. L'augmentation de 0.4% de l'emploi dans les mines était principalement attribuable aux gains dans les mines de métaux, et la hausse de 0.3% de l'emploi dans la construction s'est surtout manifestée dans le génie civil. L'emploi dans le forçage est resté pratiquement inchangé au cours du mois, les baisses enregistrées en Colombie-Britannique ayant neutralisé les augmentations de la région de l'Atlantique. L'emploi dans les manufactures a baissé de 0.2% en raison de baisses dans les biens durables.

- (1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.
- (2) L'indice synthétique industriel s'applique à l'ensemble des activités économiques, sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et le bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours de n'importe quel mois de l'année.

In the *Atlantic Region*, the industrial composite employment index rose 0.6% from August to September as gains in Newfoundland more than offset declines in the remaining three provinces. Employment increased substantially in logging, fish products, retail trade, and hotels, restaurants and taverns. The decline in employment in transportation, communication and other utilities reflected industrial disputes in communication.

The *Quebec* composite index rose 0.4% in September. The resolution of industrial disputes in urban transit coupled with substantial and widespread gains in non-durable manufacturing occasioned most of this rise. Gains in highway and bridge maintenance, retail trade and logging were offset by declines in building construction.

In *Ontario*, the composite index rose 0.6% in September. Gains were recorded in urban transit following the resolution of industrial disputes as well as in retail trade, building construction, and recreational, business and miscellaneous services. The decline in manufacturing employment reflected decreases in non-durable goods.

The industrial composite employment index for the *Prairie Region* rose 0.8% as gains in Saskatchewan and Alberta more than offset declines in Manitoba. Increased employment was recorded in building, engineering, retail trade, and hotels, restaurants and taverns. Somewhat offsetting declines occurred in durables, non-durables and business services.

In *British Columbia*, the composite employment index fell by 0.4% from August to September. The largest contributions to this decline were the decreases in durables manufacturing, especially wood products. Employment declines were also shown in logging and in communication. There were some increases in employment, notably metals mining, transportation and miscellaneous services.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 0.8% in September at the Canada industrial composite level. Gains were recorded in all industry divisions except forestry, finance, insurance and real estate, and service, which declined. All provinces except those within the Atlantic Region showed increased earnings over the month.

Unadjusted for seasonal variations, average weekly earnings at the Canada composite level rose from \$181.73 in August to \$184.32 in September. All industry divisions except for trade, finance, insurance and real estate, and service, and all provinces except Newfoundland, Prince Edward Island and Nova Scotia participated in the rise in the level of earnings.

In *forestry*, average weekly earnings rose 1.8% reflecting gains in New Brunswick and Ontario.

Dans la *région de l'Atlantique*, l'indice synthétique de l'emploi a augmenté de 0.6% entre août et septembre, les augmentations enregistrées à Terre-Neuve ayant dépassé les diminutions dans les trois autres provinces. L'emploi a considérablement augmenté dans l'abattage, les produits de la pêche, le commerce de détail, et les hôtels, restaurants et tavernes. La diminution de l'emploi dans les transports, communications et services publics reflétait les conflits du travail dans les communications.

Au *Québec*, l'indice synthétique de l'emploi a augmenté de 0.4% en septembre. La plus grande partie de cette augmentation est attribuée au règlement des conflits du travail dans les transports urbains ainsi qu'à des augmentations considérables et généralisées dans les manufactures non durables. Les augmentations dans l'entretien de routes et le commerce de détail et l'abattage ont été neutralisées par des diminutions dans le bâtiment.

En *Ontario*, l'indice synthétique de l'emploi a progressé de 0.6% en septembre. Des augmentations ont été enregistrées dans les transports urbains à la suite du règlement des conflits du travail, dans le commerce de détail, le bâtiment et les services récréatifs, extérieurs des entreprises et services divers. La diminution de l'emploi dans les manufactures a été compensée par des baisses dans les biens non durables.

L'indice synthétique de l'emploi dans la *région des Prairies* a augmenté de 0.8% les hausses en Saskatchewan et en Alberta ayant plus que compensé les baisses au Manitoba. L'emploi a augmenté dans le bâtiment, le commerce de détail et les hôtels, restaurants et tavernes. Les hausses ont été quelque peu compensées par des baisses dans les manufactures durables, les biens non durables et les services extérieurs des entreprises.

En *Colombie-Britannique*, l'indice synthétique de l'emploi a diminué de 0.4% entre août et septembre. La plus grande partie de cette baisse est imputable aux diminutions dans les manufactures de biens durables, en particulier, de produits du bois. L'emploi a également diminué dans l'abattage et les communications. On a enregistré quelques augmentations de l'emploi, notamment dans les mines de métaux, les transports et services divers.

Gains et heures de travail

Les gains hebdomadaires moyens *désaisonnalisés* au Canada ont augmenté de 0.8% en septembre. Des augmentations ont été enregistrées dans toutes les divisions de l'activité économique sauf dans le forage, les finances, les services de l'immobilier, et les services. Toutes les provinces à l'exception de la région de l'Atlantique ont enregistré des augmentations au mois.

Les gains hebdomadaires moyens *non désaisonnalisés* au Canada ont augmenté de 0.8% en septembre. L'ensemble des activités économiques au Canada ont augmenté, passant de \$181.73 en août à \$184.32 en septembre. Toutes les divisions de l'activité économique sauf le commerce, les finances, les assurances et l'immobilier, et les services d'autre part, et toutes les provinces à l'exception de Terre-Neuve, l'Île-du-Prince-Édouard et la Nouvelle-Écosse, ont participé à l'augmentation du niveau des gains.

Dans le *forage*, les gains hebdomadaires moyens ont augmenté de 1.8% à la suite d'augmentations au Nouveau-Brunswick et en

Average weekly earnings in *mining* rose 2.2% to \$245.78. Gains were recorded in all components except services incidental to mining. Average weekly hours of hourly-rated wage-earners rose from 39.8 in August to 40.1 in September, while average hourly earnings rose 7 cents to \$5.67. The increase in hours worked was mainly in non-metals while the gains in hourly earnings was in all components except services incidental to mining.

In *manufacturing*, average weekly earnings increased more than one dollar in September to \$192.85. For the most part, this increase reflected gains in durable goods as non-durables showed only a 1% increase from the previous month. Average weekly hours rose 0.2 from 38.7, while average hourly earnings showed a 10-cent increase to \$4.54. Both of these advances largely reflected gains in the durable goods component.

Average weekly earnings in *construction* rose 3.7% in September to \$267.72. Average weekly hours rose from 40.3 to 41.0 and average hourly earnings increased from \$6.45 to \$6.60. Both components — building and engineering — contributed to all these gains.

Increased average weekly earnings in communication and transportation were responsible for most of the 0.5% rise in *transportation, communication and other utilities* in September. In *trade*, average weekly earnings fell slightly to \$143.63 largely reflecting decreases in the retail component.

Average weekly earnings in *finance, insurance and real estate* rose 0.4% in September to \$173.33 largely due to declines in insurance and real estate. In *service*, average weekly earnings dropped 0.2% from \$129.92 in August to \$128.92 in September as losses were recorded in recreational, personal and miscellaneous services.

Year-to-date

ment

The average of the first nine months of 1974, compared with the same period a year earlier, showed a 5.7% rise in employment at the Canada industrial composite level. The largest industry division was in service (9.1%) and trade (7.4%); the smallest were in manufacturing (0.5%) and mining (3.7%). All provinces recorded gains in employment over-the-year; these gains ranged from 4.4% in Quebec to 10.3% in Saskatchewan.

The average of the first three quarters of 1974, compared with the same period for 1973, showed a 10.3% rise in average weekly earnings at the Canada industrial composite level. The industrial division ranged from a low of 9.0% in service to a high of 12.8% in manufacturing, communication and other utilities. All provinces recorded gains in the increased in earnings with gains ranging from 8.8% in Ontario to 14.9% in New Brunswick.

Les gains hebdomadaires moyens dans les *mines* ont augmenté de 2.2%, passant à \$245.78. Des augmentations ont été enregistrées dans tous les éléments à l'exception des services miniers. Le nombre moyen d'heures hebdomadaires travaillées par des ouvriers payés à l'heure a augmenté, passant de 39.8 en août à 40.1 en septembre, tandis que les gains horaires moyens ont augmenté de 7 cents pour atteindre \$5.67. L'augmentation des heures travaillées s'est surtout concentrée dans les mines non métalliques, et tous les éléments, sauf les services miniers, ont enregistré des augmentations dans les gains horaires.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont augmenté de plus de cinq dollars en septembre pour atteindre \$192.85. La plus grande partie de cette augmentation reflétait des gains dans les biens durables, les biens non durables n'ayant que peu augmenté par rapport au mois précédent. Le nombre moyen d'heures hebdomadaires travaillées a augmenté, passant de 38.7 à 39.2, et les gains horaires moyens ont augmenté de 10 cents, passant à \$4.54. Ces augmentations étaient en grande partie attribuables à celle dans les biens durables.

Les gains hebdomadaires moyens dans la *construction* ont augmenté de 3.7% en septembre, pour atteindre \$267.72. Le nombre moyen d'heures hebdomadaires a augmenté, passant de 40.3 à 41.0, et les gains horaires moyens ont progressé, passant de \$6.45 à \$6.60. Les deux éléments de cette activité-bâtiment et génie-civil ont contribué à toutes ces augmentations.

Les gains hebdomadaires moyens ont augmenté de 0.5% en septembre dans les *transports, communications, et autres services publics* en raison surtout d'augmentation dans les communications et les services publics. Dans le *commerce*, les gains hebdomadaires moyens ont légèrement diminué, passant à \$143.63, en raison surtout de baisses dans le commerce de détail.

Les gains hebdomadaires moyens dans les *finances, les assurances et l'immeuble* ont diminué de 0.4% en septembre, passant à \$173.33, en raison principalement de baisses dans les assurances et l'immeuble. Dans les *services*, les gains hebdomadaires moyens sont tombés de \$129.92 en août à \$128.92 en septembre à la suite de diminutions dans les services récréatifs, personnels et les services divers.

Chiffres cumulés

Emploi

La moyenne des neuf premiers mois de 1974, comparée à la même période de l'année précédente, fait état d'une augmentation de 5.7% de l'emploi au niveau de l'ensemble des activités économiques du Canada. Les augmentations les plus importantes par division de l'activité économique ont été enregistrées dans les services (9.1%) et le commerce (7.4%); les augmentations les plus faibles ont été celles du forage (0.5%) et des mines (3.7%). Toutes les provinces ont enregistré des hausses par rapport à l'année précédente, hausses s'échelonnant entre 4.4% au Québec et 8.3% en Saskatchewan.

Gains

La moyenne des trois premiers trimestres de 1974 pour ce qui est des gains hebdomadaires moyens au niveau de l'ensemble des activités économiques du Canada a progressé de 10.3% par rapport à la période correspondante de 1973. Les augmentations se sont échelonnées entre un minimum de 9.0% dans les services et un maximum de 12.8% dans les transports, communications et autres services publics. Toutes les provinces ont contribué à la hausse des gains, avec des augmentations s'échelonnant entre 8.8% en Ontario et 14.9% au Nouveau-Brunswick.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice des prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, lequel est plus représentatif de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial de la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région. p Preliminary figures. - Nombres provisoires. f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

STATISTICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)

(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for roads, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue 72-002, October 1971*.

Employment Indexes, 1965-1967, for Canada and Ontario, for roads, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

Average Weekly Earnings, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Ontario: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Quebec, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; industrial composite. *Catalogue 72-002, February 1972*.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)

(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).

2. Gains hebdomadaires moyens.

3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).

4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).

5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967*; Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971*.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le *n° 72-002 au catalogue, février 1968*.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Québec pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le *n° 72-002 au catalogue, février 1972*.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, Catalogue 72-002 July 1974.

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, communication and other utilities and industrial composite. Catalogue 72-002 September 1974.

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported from January 1973 to June 1974 for highway and bridge maintenance. Catalogue 72-002 September 1974.

All other series are published in the monthly issues of *Catalogue 72-002* for 1971, 1972 and 1973.

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^o 72-002 catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^o 72-002 au catalogue décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n^o 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pour 1965 figurent dans les n^{os} 72-201 et 72-202, au catalogue 1957-1967,

Toutes les autres données mensuelles et annuelles disponibles publiées dans les n^{os} 72-201 et 72-202, au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n^{os} 72-201 et 72-202, au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n^{os} 72-201 et 72-202 catalogue, 1968-1970.

C. 1971-1973:

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins, le commerce de détail, le commerce et l'ensemble des industries. Voir le n^o 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pour les femmes, le nombre d'employés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, communications et autres services publics et l'ensemble des industries. Voir le n^o 72-002 au catalogue, septembre 1974.

Nombre d'employés à traitement, ensemble des employés à traitement, employés à salaire (heures déclarées), rémunération hebdomadaire moyenne des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés à traitement (heures déclarées) de janvier 1973 à juin 1974 pour Canada et Québec - pour l'entretien des routes et ponts. Voir le n^o 72-002 au Catalogue, septembre 1974.

Toutes les autres séries sont publiées dans les bulletins mensuels n^o 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

(1) Les numéros des publications susmentionnées renferment les données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications n'ont pas été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Force Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated and presented in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the preceding months. In practice, few establishments keep payroll records extending precisely this period and establishments are therefore required to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the reported data are reduced to one week's proportion of the totals. The denominators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The numerators of the fractions are the number of working days in the reported pay periods. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the pay period. Fixed proportions are used to reduce the earnings to a weekly basis without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

pourcentage de l'emploi total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, du Saskatchewan et de l'Alberta sont additionnées pour former le total pour la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités; si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne peut pas transférer nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des divers groupes d'activités économiques et de groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la CTI" des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machine-outil (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) - The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) - The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

ment

Employment data represent all employees on the payrolls of units in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-directors, the self-employed, unpaid family workers, persons on non-remunerative volunteer work, pensioners, home workers, persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage- and salaried employees who are paid for their services or are absent during the reference period, except for casual employees working less than seven hours in the pay period. *Regular* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period of strike or as a consequence of a strike, or those persons on unpaid leave, are not included among the employed.

ners

Wage-earners are defined by occupation rather than by the type of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse workers, security staff, routemen, driver-salesmen, sales assistants, retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of time worked. The survey covers all wage-earners regardless of the type of payment and average weekly wages are computed for all. Derivations of average weekly hours and average hourly wages are based only upon data for wage-earners for whom hours worked are available.

employees

Unskilled employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274), de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant les déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes, au rendement, les primes de vie chère et autres gratifications régulières, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de l'employeur tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "moyennes hebdomadaires moyennes" de l'ensemble des employés en compte ici. Ce système permet maintenant d'avoir des données séparées pour tous les employés à salaire et les employés à traitement qu'autrefois on ne pouvait connaître que les "moyennes hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés dans les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des États-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre est déclaré. A remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent moins de sept heures par semaine. A l'exception des statistiques provisoires

minary(p); the latter are based on monthly averages.

Statistical Presentation

Each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only aggregated figures are released in the Statistics Canada Daily Release First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the first estimates and third estimates for the month prior to that. Of these latter estimates are of higher quality than that of the first estimates because of the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within the publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the final tabulations when all returns are retabulated to produce revised totals and annual averages; these data are contained in catalogue nos. 21 and 72-202.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1970 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1970(1)

Monthly ES - 1A Report

EMPLOYMENT, PAYROLLS AND MANHOURS

for month of _____

Please type or use lead pencil.
Final mailing deadline is the
10th of the month. Earlier mail-
ing is appreciated.
Keep one copy for your files.
Do not write in shaded areas.
Directions are mailed separately;
extra copies are available on re-
quest.

Please make any necessary changes in above name or mailing address

1. If you had any employees drawing pay in the last period(s) of the month indicated, please complete this report. If not, when do you expect to hire employees? _____
2. NUMBER OF FEMALE EMPLOYEES: (last pay period(s) in month) _____
3. TOTAL PAYROLL(S): Gross sum of all payments made at any time during the month that constitute salaries and wages for income tax purposes (see directions) _____ \$

4. PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, et le concept de l'établissement:

2 — Emploi, gains et durée du travail, Mensuel

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

3 — Estimations du revenu du travail, Mensuel

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

4 — Estimations du nombre d'employés par province et par industrie, Mensuel

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

5 — Review of Employment and Average Weekly Wages and Salaries, Annuel

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

6 — Review of Man-Hours and Hourly Earnings, Annuel

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

7 — Earnings and Hours of Work in Manufacturing, 1969, Annuel

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

8 — Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971, Annuel

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

9 — Labour Income, 1926-1958 — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

10 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1967, Annuel

11 — Estimations du nombre d'employés par province et industrie, 1961-1968, hors série

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

12 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Annuel

13 — Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969

14 — Estimations du nombre d'employés par province et par industrie, 1961-1972, hors série

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

15 — Gains et heures de travail au Canada: Commerce de détail, Septembre 1970

16 — Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970

17 — Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970

18 — Coûts de la main-d'oeuvre au Canada: industrie manufacturière, 1971

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 — Employment, Earnings and Hours, Monthly

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 — Estimates of Labour Income, Monthly

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industrial regions; with annual totals covering a 10 year period).

72-008 — Estimates of Employees by Province and Industry, Monthly

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annual

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a long period; charts and explanatory material).

72-202 — Review of Man-Hours and Hourly Earnings, Annual

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annual

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from the manufacturing sector with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 — Employment, Earnings and Hours Seasonally-adjusted Series — January 1961 — December 1971, Annual

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonally-adjusted, MCD moving average and final trend cycle).

72-502 — Labour Income, 1926-58 — Out of print, Engl.

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of methods and concepts).

72-506 — Labour Costs in Manufacturing, Annual, 1967.

72-508 — Estimates of Employees by Province and Industry, 1961-1968, Occasional

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a summary of concepts, sources and methods and indicators of sampling variability).

72-510 — Labour Costs in Manufacturing, Annual, 1968.

72-511 — Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.

72-513 — Estimates of employees by province and industry, 1961-1972, Occasional

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revisions for the period January 1961 to February 1971 inclusive and new data for subsequent months.

72-601 — Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970

72-610 — Labour Costs in Canada: Finance, Insurance and Real Estate, 1970

72-611 — Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970

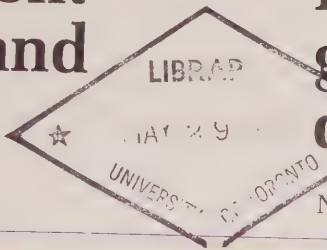

72-612 — Labour Costs in Canada: Manufacturing, 1971

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des emplois à traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

COMMENTARY

First Estimates(1) — November 1974

Seasonally-adjusted, the first estimate of the Canada industrial composite(2) index of employment (1961=100) showed a 0.3% rise from October to November. Reductions in employment in manufacturing, trade and service more than offset gains in the mining industry divisions. Declines were recorded in Quebec and Ontario; the remaining regions showed gains.

Average weekly earnings, unadjusted for seasonal variations, rose 0.3% at the Canada composite level in November. Gains were recorded in all industry divisions except forestry, construction and mining which declined. All regions except the Prairies contributed to the overall advance.

Preliminary Data(1) — October 1974

Employment — (Seasonally-Adjusted)

Preliminary data for October 1974 showed a rise of 0.4% in the Canada industrial composite index of employment. Gains were recorded in all industry divisions except mining and manufacturing, which declined.

Employment advanced 1.2% in service mainly reflecting increases in other services to business management and hotels, restaurants and taverns. The 0.8% rise in finance, insurance and real estate was mainly due to increases in financial institutions. Resolution of labour disputes in water transport and services, grain elevators and the 0.2% increase in transportation, communication and utilities. Forestry rose 2.1% due to gains in logging in British Columbia.

Employment in trade rose slightly reflecting gains in the service component, while the 0.3% increase in construction remains in engineering. Manufacturing employment decreased over-the-month. Employment reductions in wood products, food products and paper and allied industries more than offset gains in metal fabricating industries and electrical producing employment dropped 0.3% in October as the declines were more substantial than the gains in non-metals.

In the Atlantic Region, the composite index rose slightly; gains were recorded in all provinces except Newfoundland. Employment

Source: Statistical Presentation under Concepts and Methods of the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, and households and public administration and defence. All figures are based on returns received from employers having 20 or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) - November 1974

La première estimation désaisonnalisée de l'indice composite(2) de l'emploi dans les branches d'activité économique du Canada (1961=100) fait état d'une diminution de 0.3% entre octobre et novembre. Les baisses enregistrées dans les industries manufacturières, le commerce et les services ont plus que contrebalancé les augmentations observées dans les autres divisions. Le Québec et l'Ontario ont connu des baisses, les autres régions ont enregistré des augmentations.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 0.3% en novembre pour l'ensemble des activités économiques au Canada. Toutes les divisions ont connu des augmentations, sauf le forage, la construction et le commerce qui ont enregistré des diminutions. Toutes les régions sauf les Prairies ont participé à la progression globale.

Données provisoires(1) — Octobre 1974

Emploi — (chiffres désaisonnalisés)

Les données provisoires d'octobre 1974 font ressortir un accroissement de 0.4% de l'indice composite de l'emploi dans l'ensemble des activités économiques au Canada. L'emploi s'est accru dans toutes les divisions d'activités économiques sauf dans les mines et les industries manufacturières, où il a régressé.

L'emploi a progressé de 1.2% dans les services, reflétant des augmentations dans les autres services extérieurs des entreprises et dans les hôtels, restaurants et tavernes. L'augmentation de 0.8% dans les finances, assurances et immeuble est attribuable surtout aux augmentations dans les établissements financiers. Le règlement des conflits de travail dans les transports par eau et services, élévateurs à grains et téléphone explique l'augmentation de 0.2% dans les transports, communications et autres services d'utilité publique. Une progression de 2.1% a été observée dans le forage à cause des augmentations enregistrées dans l'abattage au Québec et en Colombie-Britannique.

L'emploi dans le commerce a légèrement progressé en raison de l'augmentation dans le commerce de gros, et dans la construction il a progressé de 0.3% par suite de l'augmentation dans le génie civil. L'emploi dans les industries manufacturières a légèrement diminué au cours du mois. Les réductions dans les industries du bois, des textiles et du papier et industries connexes ont plus que contrebalancé les augmentations dans les industries du caoutchouc, des produits métalliques et des appareils et matériel électriques. L'emploi dans les mines a baissé de 0.3% en octobre, les diminutions dans les mines de métaux ayant été plus importantes que les augmentations dans les mines non métalliques.

Dans la région de l'Atlantique, l'indice composite a légèrement augmenté; toutes les provinces, sauf Terre-Neuve, ont enregistré des

- (1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.
- (2) L'indice composite s'applique à l'ensemble des activités économiques sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations soumises par les employeurs comptant au moins vingt (20) employés au cours d'un mois quelconque de l'année.

advanced 1.1% in transportation, communication and other utilities following the resolution of industrial disputes in telephone. Gains were also recorded in financial institutions and durables manufacturing, while declines occurred in metals mining and building construction.

The *Quebec* composite index of employment showed only a slight rise from September to October. Employment increased in logging, business services, miscellaneous services, department stores, engineering, and water transport and services. These gains were offset for the most part by declines in employment in food and beverages, miscellaneous manufacturing industries, wood products, paper and allied industries and textile products.

In *Ontario*, the industrial composite employment index rose 0.2% in October. This gain largely reflected increases in manufacturing where gains in rubber products, metal fabricating industries and transportation equipment substantially more than outweighed declines in textile products, paper and allied industries, primary metal industries and machinery except electrical. In addition, there were advances in business services, hotels, restaurants and taverns, financial institutions and water transport and services, and there were declines in logging, building and retail trade.

The composite index of employment for the *Prairie Region* showed a 1.3% rise over-the-month as all three provinces recorded gains. Employment advances were recorded in transportation, communication, business services, hotels, restaurants and taverns, wholesale trade, retail trade and mineral fuels. The 1.5% decline in construction mainly reflected losses in the engineering component.

In *British Columbia*, the composite index fell 0.5% from September to October. The largest contributing factors to this decline were the substantial layoffs in wood products and the large decline in department stores. Somewhat offsetting gains occurred in storage, logging, fish products and hotels, restaurants and taverns.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 1.4% at the Canada industrial composite level in October. Gains were recorded in all industry divisions and in all provinces.

Unadjusted for seasonal variations, average weekly earnings at the Canada composite level rose from \$184.37 in September to \$187.25 in October. Increases were recorded in all industry divisions and in all provinces except Prince Edward Island.

In *forestry*, average weekly earnings rose 4.3% to \$239.69 reflecting gains in all five regions.

Average weekly earnings in *mining* increased by 3.1% in October as gains were recorded in all components. Average weekly hours of hourly-rated wage-earners rose from 40.2 in September to

avances. L'emploi a progressé de 1.1% dans les transports, les communications et autres services d'utilité publique par la suite du règlement de conflits de travail dans le secteur du téléphone. Les établissements financiers et les industries de biens durables ont également connu une hausse de l'emploi, tandis que les mines métalliques et le bâtiment ont accusé des baisses.

Au *Québec*, l'indice composite de l'emploi n'a que légèrement augmenté de septembre à octobre. L'emploi s'est accru dans l'abattage, les services extérieurs des entreprises, les services divers, les grands magasins et les transports par eau et les services. Ces gains ont été contrebalancés en grande partie par des baisses dans les aliments et boissons, les industries manufacturières diverses, les produits du bois, les industries du papier et industries connexes et les industries textiles.

En *Ontario*, l'indice composite de l'emploi a progressé de 0.2% en octobre. Cet accroissement traduit en grande partie les augmentations dans les industries manufacturières, où les progressions enregistrées dans l'industrie du caoutchouc, l'industrie des produits métalliques et l'industrie du matériel de transport ont largement compensé les diminutions dans l'industrie textile, l'industrie du papier et industries connexes, l'industrie métallique primaire et l'industrie de la machinerie (sauf le matériel électrique). En outre, des augmentations se sont produites dans les services extérieurs des entreprises, dans les hôtels, restaurants et tavernes, les établissements financiers et dans les transports par eau et les services, et des diminutions ont été observées dans l'abattage, le bâtiment et le commerce de détail.

L'indice composite de l'emploi dans la *région des Prairies* a progressé de 1.3% par rapport au mois précédent, les trois provinces ayant enregistré des augmentations. Ces augmentations ont été observées dans les transports, les communications, les services extérieurs des entreprises, les hôtels, restaurants et tavernes, le commerce de gros, le commerce de détail et les combustibles minéraux. La baisse de 1.5% dans la construction traduite en grande partie les pertes dans l'élément génie civil.

En *Colombie-Britannique*, l'indice composite a fléchi de 0.5% en septembre et octobre. Les mises à pied importantes dans l'industrie du bois et la baisse considérable de l'emploi dans les grands magasins sont les principaux facteurs responsables de cette diminution. Comme éléments compensateurs, on peut mentionner les augmentations dans l'entreposage, l'abattage, l'industrie du poisson et les hôtels, restaurants et tavernes.

Gains et heures de travail

Les gains hebdomadaires moyens *désaisonnalisés* ont progressé de 1.4% en octobre pour l'ensemble des activités économiques au Canada. Des augmentations ont été enregistrées dans toutes les divisions d'activités économiques et dans toutes les provinces.

Les gains hebdomadaires moyens *non désaisonnalisés* pour l'ensemble des activités économiques au Canada sont passés de \$184.37 en septembre à \$187.25 en octobre. Des augmentations ont été enregistrées dans toutes les divisions d'activités économiques et dans les provinces à l'exception de l'Île-du-Prince-Édouard.

Dans le *forêtage*, les gains hebdomadaires moyens ont monté de 4.3% pour atteindre \$239.69; les cinq régions ont participé à l'accroissement.

Les gains hebdomadaires moyens dans les *mines* ont progressé de 3.1% en octobre, des augmentations ayant été observées dans toutes les composantes. Le nombre moyen d'heures de travail par semaine

8 in October, while average hourly earnings jumped 15 cents to 80.

In *manufacturing*, average weekly earnings increased by \$3.81 to \$196.50 reflecting widespread gains in both durables and non-durables. Average weekly hours showed almost no change over the month. Average hourly earnings increased by 9 cents from \$4.54 to \$4.63.

Average weekly earnings in *construction* rose slightly in October as gains in the building component were mostly offset by losses in the engineering component. Average weekly hours dropped from 40.9 in September to 40.3 in October with losses in both components, while average hourly earnings rose 7 cents to \$6.72 due to gains in building.

In *transportation, communication and other utilities* average weekly earnings rose to \$211.58 reflecting gains in all components, while in *trade*, average weekly earnings rose 1.5% to \$145.31 following gains in both wholesale and retail.

Average weekly earnings in *finance, insurance and real estate* rose from \$172.90 to \$174.48 following gains in both financial institutions and insurance and real estate. Average weekly earnings in *recreation* rose 2.1% as gains were recorded in recreational, business and personal services.

employés payés à l'heure est passé de 40.2 en septembre à 40.8 en octobre, et les gains horaires moyens ont augmenté de 15 cents pour s'établir à \$5.80.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont monté de \$3.81 pour s'établir à \$196.50; cette augmentation reflète des hausses dans les biens durables et non durables. Le nombre moyen d'heures de travail par semaine n'a presque pas varié au cours du mois. Les gains horaires moyens ont augmenté de 9 cents, passant de \$4.54 à \$4.63.

Les gains hebdomadaires moyens dans la *construction* ont légèrement progressé en octobre, les augmentations dans le bâtiment ayant été presque entièrement contrebalancées par des baisses dans le génie civil. Le nombre moyen d'heures de travail par semaine est tombé de 40.9 en septembre à 40.3 en octobre, les deux composantes ayant accusé des baisses, alors que les gains horaires moyens ont augmenté de 7 cents pour s'établir à \$6.72 en raison des hausses dans le bâtiment.

Dans les *transports, communications et autres services d'utilité publique*, les gains hebdomadaires moyens ont monté à \$211.58, toutes les composantes ayant enregistré des augmentations, alors que dans le *commerce* ils ont progressé de 1.5% pour s'établir à \$145.31, en raison des hausses dans le commerce de détail et de gros.

Les gains hebdomadaires moyens dans les *finances, assurances et immobilier* sont passés de \$172.90 à \$174.48, par suite des augmentations dans les établissements financiers et dans les assurances et immobilier. La hausse de 2.1% dans les *services* reflète des augmentations dans les services récréatifs, services extérieurs des entreprises et services personnels.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant. Cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to restate this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying a weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

P Preliminary figures. - Nombres provisoires.
 F First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

STATISTICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)

(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, Catalogue 72-002, October 1971.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. Catalogue 72-002, February 1968.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Quebec: Region: Transportation, communication and other utilities; Highway and bridge maintenance.

Atlantic: Transportation, communication and other utilities; Transportation.

Manitoba: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. Catalogue 72-002, November 1971.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Quebec, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. Catalogue 72-002, February 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)

(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).

2. Gains hebdomadaires moyens.

3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).

4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).

5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n° 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. n° 72-002 au catalogue, novembre 1971.

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Québec pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, Catalogue 72-002 July 1974.

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, communication and other utilities and industrial composite. Catalogue 72-002 September 1974.

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported from January 1973 to June 1974 for highway and bridge maintenance. Catalogue 72-002 September 1974.

All other series are published in the monthly issues of *Catalogue 72-002 for 1971, 1972 and 1973.*

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n° 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyennes hebdomadaires moyennes - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n° 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n° 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pour 1965 figurent dans les n°s 72-201 et 72-202, au catalogue, 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles publiées dans les n°s 72-201 et 72-202, au catalogue, 1966-1968@+1

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202, au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202, au catalogue, 1968-1970.

C. 1971-1973:

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre d'employés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, communication et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue, septembre 1974.

Nombre d'employés à traitement, ensemble des employés à salaire déclarés, rémunération hebdomadaire moyenne des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées) de janvier 1973 à juin 1974 pour Canada et Québec. Voir le n° 72-002 au catalogue, septembre 1974.

Toutes les autres séries sont publiées dans les bulletins mensuels de *Catalogue 72-002* pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated and presented in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "mark-up" or "gross profit" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer employees.

Reference Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore required to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the data are reduced to one week's proportion of the totals. The factors of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the month or pay periods. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the month. Proportions are used to reduce the earnings to a weekly basis with regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday or dispute affects the two periods differently, so that the data more accurately reflects the actual situation during the reference period.

Most industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household services, public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deçà de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

pourcentage de l'emploi total qui est observé dépend du rapport des établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête sur le pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, du Nouveau-Brunswick, du Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont regroupées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total pour la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent généralement le territoire avoisinant avec le centre urbain. On peut, sur demande, obtenir une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités; si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des divers types d'activités économiques et de groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machine (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) - The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) - The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of units in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-directors, the self-employed, unpaid family workers, persons on non-remunerative volunteer work, pensioners, home workers, persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earning and salaried employees who are paid for their services or are absent during the reference period, except for casual employees working less than seven hours in the pay period. *Regular* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on unpaid leave, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the mode of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse work, clerical staff, security staff, routemen, driver-salesmen, sales assistants, retail stores, waitresses, and working foremen performing similar to those of the employees whom they supervise, etc. Employees may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the mode of payment and average weekly wages are computed for all employees. Derivations of average weekly hours and average hourly wages are based only upon data for wage-earners for whom hours are available.

Employees

Employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274), de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les employés réguliers à temps partiel sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de l'oeuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux rémunérations hebdomadaires moyennes" de l'ensemble des employés en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement, ce qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 du méthode II du recensement des États-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures déclarées. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (P)

inary(p); the latter are based on monthly averages.

astical Presentation

Each month, statistics for three months are prepared by the High Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only aggregated figures are released in the Statistics Canada Daily News. The First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the first, and third estimates for the month prior to that. The second and third estimates are of higher quality than that of the first, due to the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within the publication.

After completion of the third estimate, further revisions to the are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical special tables and in column for the previous year in tables 2, 3 of this publication. The smaller corrections are completed in the tabulations when all returns are retabulated to produce revised and annual averages; these data are contained in catalogue nos 72-202.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 - Employment, Earnings and Hours, M. Angl.

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

2-005 - Estimations du Revenu du Travail; M. Bil.

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

2-008 - Estimations du nombre d'employés par province et par industrie, M. Bil.

(Estimations du nombre total d'employés; comparaisons avec les chiffres correspondants du mois précédent et de l'année précédente).

2-201 - Review of Employment and Average Weekly Wages and Salaries, A. Angl.

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: indices mensuels et annuels, pour une longue période; graphiques et notes explicatives).

2-202 - Review of Man-Hours and Hourly Earnings, A. Angl.

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région, données mensuelles et annuelles, pour une longue période; graphiques et notes explicatives).

2-204 - Earnings and Hours of Work in Manufacturing, 1969, Angl.

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, ouvriers et salariés, pour une semaine d'octobre, à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

2-206 - Indices de l'emploi désaisonnalisés. Janvier 1961 à décembre 1970, Bil.

(Indices de l'emploi, par activité économique et par région: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés et moyennes mobiles MDC; heures hebdomadaires moyennes et gains horaires moyens).

502 - Labour Income, 1926-1958 - épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

508 - Estimations du nombre d'employés par province et par industrie, 1961-1968, Bil.

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

510 - Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Bil.

511 - Coûts de la main-d'oeuvre au Canada-Mines, carrières et puits de pétrole, 1969, Bil.

(Publication annuelle couvrant diverses branches d'activité sur une base cyclique ou irrégulière. Estimations de certains coûts de main-d'oeuvre, par groupe d'activité économique et par région - Publication conjointe de la Division du travail de Statistique Canada et de la Direction de l'économie et des recherches du ministère du Travail du Canada).

201 - Gains et heures de travail au Canada - Commerce de détail, septembre 1970, Bil.

(Gains hebdomadaires moyens, gains horaires moyens et heures hebdomadaires moyennes des employés des deux sexes dans le commerce de détail, selon la situation, ("à plein temps", "à temps partiel et occasionnels" et rattachés au "siège social", pour le Canada, les provinces et certaines régions urbaines).

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours.

71-000 - Employment, Earnings and Hours, N. Engl.

Indicates and gives, among numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and month; earnings; historical comparisons; charts and explanatory material).

71-001 - Estimates of Labour Income, N. Engl.

Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for manufacturing industries and business, with annual totals covering a 10 year period).

71-002 - Estimates of Employment in Industry and Industry, N. Engl.

Estimates of total numbers of employees, with comparisons with a month and a year earlier).

71-003 - Survey of Employment and Average Weekly Wages and Salaries, N. Engl.

Industry and total average numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a long period (charts and explanatory material).

71-004 - Survey of Man-Hours and Hourly Earnings, N. Engl.

Industry and total average numbers of hours per week, month and weekly wages, monthly and annually, over a long period (charts and explanatory material).

71-005 - Earnings and Hours of Women in Manufacturing, 1948-58, Engl.

Extensive statistics on earnings and hours for men and women and for salaried employees and wage-earners in one year, 1948-58, from 1948-58 industrial and commercial sources and explanatory material. Special data are obtained on a continuing basis in subsequent years.

71-006 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Btl.

Indicates and gives, among numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and 1960 monthly weights (without weekly hours and hourly earnings).

71-007 - Labour Income, 1926-58 - Out of print, Engl.

A series of annual estimates of labour income from 1926 to 1958, along with monthly figures for 1947; contains descriptions of sources, methods and limitations.

71-008 - Estimates of Employment in Industry and Industry, 1961-68, Btl.

Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces (includes a survey of concepts, sources and methods and evaluation of sampling variability).

71-009 - Labour Costs in Manufacturing, 1961-68, Btl.

71-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Btl.

An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer labour costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economic and Research Branch of Labour Canada.

71-601 - Earnings and Hours of Men in Canada - Retail Trade Industry, September 1970, Btl.

Extensive statistics on earnings and hours of male employees in retail trade, "part-time and casual" and "head office" employees for Canada, provinces and territories.

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social conditions. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), KIA 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- — amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- — nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des emplois à temps partiel et des employés à salaire indiqués séparément, signifient des données relatives aux employés pour lesquels les heures sont enregistrées et qui ne sont pas disponibles.

to Users:

Data in this issue on index numbers for October 1974 reflect only the normal monthly adjustment from preliminary to revised information, but also, in some instances, recent corrections made to base year (1961) data. These corrections have an aggregate effect of 0.4% on the Canada industrial composite employment index from September to October, however they do not affect ongoing data since October. The distorting effect of these corrections will be adjusted in annual publications for 1973 and 1974.

First Estimates(1) – December 1974

Seasonally-adjusted, the first estimate of the Canada industrial composite(2) index of employment (1961=100) showed no change from November to December. Decreases in manufacturing and offset gains in the remaining industry divisions. Declines were noted in Ontario and British Columbia; the remaining regions had gains.

Average weekly earnings, unadjusted for seasonal variations, fell 0.2% in December at the Canada composite level. For the most part, this decline reflected the seasonal decrease in hours worked in manufacturing and construction. All regions except the Atlantic region participated in the overall decline in the level of earnings.

Preliminary Data(1) – November 1974

Employment – (Seasonally-Adjusted)

Preliminary data for November 1974 showed a slight decline in the Canada industrial composite index of employment. Gains were recorded in manufacturing, trade and service; the remaining industry divisions showed gains.

Employment fell 0.7% in manufacturing to the lowest point of the year. In durables, decreases in wood products, motor vehicles and other products outweighed the gains recorded in smelting and refining following the resolution of industrial disputes. Similarly, in non-durables, declines in food and beverages and textile products offset gains in rubber products, following the resolution of industrial disputes.

Note on Statistical Presentation under Concepts and Methods at the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

Avis aux lecteurs:

Les données de la présente édition, qui portent sur les indices pour octobre 1974 traduisent non seulement les rectifications mensuelles habituelles (ajustement des données provisoires en fonction des renseignements définitifs) mais aussi dans certains cas, les corrections récentes apportées aux données de l'année de base (1961). Ces corrections entraînent une variation globale de 0.4 % sur l'indice synthétique de l'emploi dans les activités économiques du Canada de septembre à octobre; toutefois elles ne modifient pas les données courantes depuis octobre. L'effet de distorsion de ces corrections sera rectifié dans les publications annuelles pour 1973 et 1974.

Premières estimations(1) – Décembre 1974

La première estimation désaisonnalisée de l'indice composite de l'emploi dans les activités économiques(2) du Canada (1961=100) est restée inchangée entre novembre et décembre. Les baisses dans la fabrication et les services ont compensé les gains enregistrés dans les autres divisions de l'activité économique. Des baisses ont été enregistrées en Ontario et en Colombie-Britannique et des augmentations, dans les autres régions.

Les gains hebdomadaires moyens non désaisonnalisés au niveau de l'ensemble des activités économiques du Canada ont baissé de 1.2% en décembre. En général, ce recul est imputable à la baisse saisonnière du nombre d'heures travaillées dans la fabrication et la construction. Toutes les régions, sauf celle de l'Atlantique, se sont ressenties de cette baisse générale.

Données provisoires(1) – Novembre 1974

Emploi – (chiffres désaisonnalisés)

Les données provisoires pour novembre 1974 révèlent un faible recul (0.1%) de l'indice composite de l'emploi dans les activités économiques du Canada. Les baisses ont été enregistrées dans la fabrication, le commerce et les services; les autres divisions de l'activité économique ont progressé.

L'emploi a baissé de 0.7% dans le secteur de la fabrication, tombant ainsi à son plus bas niveau de l'année. Pour les biens durables, les baisses observées dans le cas des produits du bois, des véhicules automobiles et des appareils et matériel électriques ont de loin compensé les augmentations enregistrées dans la fonte et l'affinage, après le règlement de conflits de travail. De même, les baisses observées dans le cas des biens non durables (aliments et boissons, produits du textile) ont plus que compensé les augmentations enregistrées dans les produits du caoutchouc, après le règlement de conflits de travail.

- (1) Voir Présentation statistique sous Concepts et méthodes, à la fin de la présente publication.
- (2) L'ensemble des activités économiques comprend toutes les branches d'activité sauf l'agriculture la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et le bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours d'un mois quelconque de l'année.

In trade, employment dropped 0.8% from October to November. Widespread increases in the wholesale component were more than offset by declines in retail trade, especially food stores and department stores. The decline in food stores was mainly the result of industrial disputes. Service employment showed a slight decline; gains in hotels, restaurants and taverns were balanced by decreases in recreational and business services.

Transportation, communication and other utilities showed a 0.8% rise in employment mainly reflecting increases in highway and bridge maintenance and the resolution of industrial disputes in telephone. Employment in construction rose 1.4% with increases in both building and engineering. Mining increased 1.4% following the resolution of industrial disputes in metals, while increases in both financial institutions and insurance and real estate occasioned a 0.5% rise in employment in finance, insurance and real estate. Forestry advanced 1.2% mainly reflecting gains in forestry services.

In the *Atlantic Region*, the composite index rose 1.6% in November as gains were recorded in all provinces except Prince Edward Island. Employment increases occurred in highway and bridge maintenance, telephone, logging, hotels, restaurants and taverns, and foods. The substantial decline in trade mainly reflected losses in department stores and variety stores.

The *Quebec* composite employment index showed virtually no change from October to November. Manufacturing employment dropped 0.6% reflecting declines in food and beverages, textile products, wood products, electrical products and miscellaneous manufacturing industries. Offsetting gains were recorded in highways and bridge maintenance, telephone, insurance and real estate and hotels, restaurants and taverns.

In *Ontario*, the industrial composite index of employment fell 0.8% in November. For the most part, this decline reflected decreases in manufacturing as employment was reduced in textile products, paper and allied industries, primary metal industries, machinery, motor vehicles, electrical products and miscellaneous manufacturing industries. The decline in trade mainly reflected losses in department stores, while the decrease in service was mainly in business services.

The composite index for the *Prairie Region* rose 1.0% in November as gains were recorded in all three Prairie provinces. Employment gains were recorded in building, engineering, transportation, communication, financial institutions, insurance and real estate and hotels, restaurants and taverns. The decline in trade reflected industrial disputes in food stores.

In *British Columbia*, the composite employment index rose 0.3% from October to November. Employment advanced in metals mining and primary metal industries following the resolution of industrial disputes. Additional increases were recorded in fish pro-

L'emploi dans le commerce a baissé de 0.8% entre octobre et novembre, car les gains généralisés dans le commerce de gros ont été neutralisés par les baisses observées dans le commerce de détail, et particulièrement dans les magasins d'alimentation et les grands magasins (celles des magasins d'alimentation étaient surtout attribuables à des conflits de travail). L'emploi dans le secteur des services a fléchi légèrement, tandis que les gains enregistrés dans les hôtels, restaurants et tavernes ont été compensés par les baisses observées dans les services récréatifs et ceux fournis aux entreprises.

L'augmentation de 0.8% de l'emploi dans les transports, communications et autres services traduit principalement l'accroissement du main-d'œuvre affectée à l'entretien des routes et des ponts et le règlement de conflits de travail dans l'industrie des services téléphoniques. L'emploi dans la construction a progressé de 1.4% : des augmentations ont été observées dans le bâtiment et le génie civil. Après le règlement de conflits de travail dans les mines métalliques, l'emploi dans le secteur minier a progressé de 1.4%, alors qu'il a augmenté de 0.5% dans les finances, assurances et immeuble en raison des augmentations enregistrées à la suite pour les établissements financiers et les assurances et l'immeuble. L'emploi dans le forestage s'est accru de 1.2% en raison surtout des progrès notés dans les services forestiers.

L'indice composite a progressé de 1.6% en novembre, dans la région de l'Atlantique, car des gains ont été enregistrés dans toutes les provinces sauf dans l'Île-du-Prince-Édouard. Des augmentations de l'emploi ont été notées pour l'entretien des routes et des ponts, les services téléphoniques, l'abattage, les hôtels, les restaurants et tavernes, et les aliments. Le gain appréciable dans le cas du commerce traduit surtout les pertes subies par les magasins à rayons et les bazars.

L'indice composite de l'emploi au Québec n'a pratiquement pas changé entre octobre et novembre. L'emploi dans la fabrication a fléchi de 0.6% en raison des baisses enregistrées dans les aliments et boissons, produits du textile, les produits du bois, les appareils et matériel électriques et diverses industries manufacturières. Des gains compensatoires ont été observés dans l'entretien des routes et des ponts, les services téléphoniques, les assurances et l'immeuble et dans les hôtels, les restaurants et tavernes.

En Ontario, l'indice composite de l'emploi dans les activités économiques a baissé de 0.8% en novembre. Cette baisse est attribuable en grande partie au recul observé dans le secteur manufacturier car l'emploi a baissé dans les industries suivantes : produits du textile, industries du papier et produits connexes, industries des métaux (formes primaires), machines, véhicules automobiles, appareils et matériel électrique, industries manufacturières diverses. Dans le commerce, la baisse traduit principalement les pertes subies dans les magasins à rayons, tandis que le recul du secteur des services était surtout attribuable aux services extérieurs aux entreprises.

L'indice composite pour la région des Prairies s'est accru de 1.0% en novembre en raison des gains enregistrés dans chacune des trois provinces des Prairies. Des augmentations de l'emploi ont été observées dans la construction, le génie civil, le transport, les communications, les établissements financiers, les assurances et l'immeuble, les hôtels, les restaurants et les tavernes. La baisse dans le commerce est attribuable aux conflits de travail dans les magasins d'alimentation.

En Colombie-Britannique, une hausse de 0.3% a été observée entre octobre et novembre dans l'indice composite de l'emploi. Celui-ci a progressé dans le cas de l'extraction des métaux, et des industries métallurgiques (formes primaires) à la suite du règlement de conflits de travail.

and department stores. Somewhat offsetting declines occurred in food products, railway transport and logging.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 1.0% at the Canada industrial composite level in November. Gains were recorded in all industry divisions except forestry and construction and in all provinces except Newfoundland and New Brunswick.

Unadjusted for seasonal variations, average weekly earnings at the Canada composite level rose 0.3% to \$187.56.

In *forestry*, average weekly earnings fell 0.6% in November to \$189.99 mainly reflecting fewer hours worked in Ontario and British Columbia.

Average weekly earnings in *mining* rose 2.0% from October to November. Gains were recorded in all components except quarries and pits. Average weekly hours of hourly-rated wage-earners rose from 40.8 to 41.1 mainly due to gains in mineral fuels, while average hourly earnings rose 9 cents to \$5.88.

In *manufacturing*, average weekly earnings rose 0.3% in November as gains in non-durables were somewhat offset by declines in durables component. Average weekly hours fell to 39.0 from 39.2 with declines in both components. Average hourly earnings rose 2 cents to \$5.22, a 2 cent rise reflecting widespread gains in the non-durables component.

Average weekly earnings in *construction* fell 1.4% to \$267.22 in November. Gains occurred in all regions except British Columbia. Both housing and building contributed to the overall decline. Average weekly hours declined from 40.5 in October to 39.0 in November, while average hourly earnings rose 14 cents to \$6.91.

In *transportation, communication and other utilities*, average weekly earnings rose 0.4% to \$212.05 due to increases in the transportation component.

Average weekly earnings in *trade* rose 1.1% to \$145.81 following widespread increases in both wholesale and retail.

In *finance, insurance and real estate*, average weekly earnings rose from \$174.21 to \$176.38 mainly reflecting gains in financial services. Average weekly earnings in *service* increased by 1.0% as a result of gains in personal and miscellaneous services.

D'autres augmentations ont été signalées pour les produits de la pêche et les magasins à rayons. Des baisses pour les produits du bois, les transports ferroviaires et l'abattage ont quelque peu contrebalancé les augmentations.

Gains et heures de travail

En novembre, les gains hebdomadaires moyens, *désaisonnalisés*, au niveau de l'ensemble des activités économiques du Canada ont progressé de 1.0%. Des progressions ont été enregistrées dans toutes les divisions de l'activité économique à l'exception du forestage et de la construction, et dans toutes les provinces, à l'exception de Terre-Neuve et du Nouveau-Brunswick.

Les gains hebdomadaires moyens, *non désaisonnalisés*, au niveau de l'ensemble des activités économiques du Canada ont progressé de 0.3% pour passer à \$187.56.

Dans le *forestage*, les gains hebdomadaires moyens ont accusé une baisse de 0.6% en novembre pour s'inscrire à \$239.09 en raison de la réduction du nombre d'heures travaillées en Ontario et en Colombie-Britannique.

Les gains hebdomadaires moyens dans les *mines*, ont progressé de 2.0% entre octobre et novembre. Des progressions ont été signalées pour tous les éléments, sauf les carrières et les sablières. Le nombre moyen d'heures hebdomadaires travaillées par des ouvriers payés à l'heure a augmenté, passant de 40.8 à 41.1, en raison des progressions signalées dans les combustibles minéraux, tandis que les gains horaires moyens augmentaient de 9 cents pour atteindre \$5.88.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont progressé de 0.3% en novembre, car les augmentations signalées dans les biens non durables ont été compensées en partie par les baisses enregistrées pour les biens durables. Le nombre moyen d'heures par semaine a fléchi, passant de 39.2 à 39.0, les baisses touchant les deux éléments. Les gains horaires moyens ont accusé une hausse de 2 cents en raison des accroissements généralisés enregistrés pour l'élément biens non durables.

Les gains hebdomadaires moyens dans la *construction* ont fléchi de 1.4% pour s'inscrire à \$267.22 en raison des baisses enregistrées dans toutes les régions, sauf dans la Colombie-Britannique. Les deux éléments de cette activité, soit le bâtiment et le génie civil, ont contribué à cette baisse générale. Le nombre moyen d'heures par semaine a baissé, passant de 40.5 en octobre à 39.0 en novembre, tandis que les gains horaires moyens ont progressé de 14 cents pour atteindre \$6.91.

Dans les *transports, les communications et autres services d'utilité publique*, les gains hebdomadaires moyens ont monté de 0.4% pour atteindre \$212.05 en raison des augmentations enregistrées pour l'élément transport.

Dans le *commerce*, les gains hebdomadaires moyens ont progressé de 1.1% pour atteindre \$145.81 en raison des augmentations généralisées des deux éléments commerce de gros et commerce de détail.

Dans les *finances, les assurances et l'immeuble*, les gains hebdomadaires moyens ont augmenté, passant de \$174.21 à \$176.38, par suite des progressions réalisées surtout dans les établissements financiers. Les gains hebdomadaires moyens dans les *services* ont progressé de 1.0%, en raison surtout des accroissements notés pour les services personnels et divers.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. Le moyenné des salaires hebdomadaires courants pour un mois quelconque est donc rectifié, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région. p Preliminary figures. - Nombres provisoires. f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Notes: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. - Les rémunérations hebdomadaires courantes ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation est donc rectifié, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au Catalogue. 3. This table relates to average weekly earnings of all employees. - Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés. p Preliminary figures. - Données provisoires. f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)

(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

B. 1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue 72-002, October 1971*.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

New Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. *Catalogue 72-002, February 1972*.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)

(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971*.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le *n° 72-002 au catalogue, février 1968*.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le *n° 72-002 au catalogue, février 1972*.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, Catalogue 72-002 July 1974.

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, communication and other utilities and industrial composite. Catalogue 72-002 September 1974.

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. Catalogue 72-002 September 1974.

All other series are published in the monthly issues of *Catalogue 72-002* for 1971, 1972 and 1973.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n° 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n° 72-002 au catalogue décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n° 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les n°s 72-201 et 72-202 au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles publiées dans les n°s 72-201 et 72-202 au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1968-1970.

C. 1971-1973:

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins rayons, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre d'employés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, communications et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue septembre 1974.

Nombre d'employés à traitement, ensemble des employés à salaire, employés à salaire (heures déclarées), rémunération hebdomadaire moyenne des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n° 72-002 au catalogue, septembre 1974.

Toutes les autres séries sont publiées dans les bulletins mensuels de *Catalogue 72-002* pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Income Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated to present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section then requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, these earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of total employment by industry as well as by province and urban area. The percentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

pourcentage de l'emploi total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (n° 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la CTI" des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machine-outil (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) - The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) - The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes sole owners or partners in unincorporated businesses, non-voting directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on unpaid leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the mode of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the mode of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly wages are based only upon data for wage-earners for whom hours are available.

Salaried Employees

Salaried employees constitute executive, administrative, super-technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les employés réguliers à temps partiel sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui

liminary(p); the latter are based on monthly averages.

Statistical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only highly aggregated figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Each of these latter estimates are of higher quality than that of the first because of the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within the publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the final tabulations when all returns are retabulated to produce revised monthly and annual averages; these data are contained in catalogue nos 72-01 and 72-02.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-01 et 72-02.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1970 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1970(1)

Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

These percentages are exceptionally small because non-commercial services, including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont exceptionnellement petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

These percentages are smaller than might be expected as both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits que l'on pourrait s'y attendre parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

- 72-002 - Employment, Earnings and Hours, M. Angl.
(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).
- 72-005 - Estimations du Revenu du Travail; M. Bil.
(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).
- 72-008 - Estimations du nombre d'employés par province et par industrie, M. Bil.
(Estimations du nombre total d'employés; comparaisons avec les chiffres correspondants du mois précédent et de l'année précédente).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Angl.
(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: indices mensuels et annuels, pour une longue période; graphiques et notes explicatives).
- 72-202 - Review of Man-Hours and Hourly Earnings, A. Angl.
Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région, données mensuelles et annuelles, pour une longue période; graphiques et notes explicatives).
- 72-204 - Earnings and Hours of Work in Manufacturing, 1969, Angl.
(Données distinctes sur les gains et les heures de travail des hommes et des femmes, ouvriers et salariés, pour une semaine d'octobre, à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).
- 72-206 - Indices de l'emploi désaisonnalisés. Janvier 1961 à décembre 1970, Bil.
(Indices de l'emploi, par activité économique et par région: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés et moyennes mobiles MDC; heures hebdomadaires moyennes et gains horaires moyens).
- 72-502 - Labour Income, 1926-1958 - épuisé, Angl.
(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)
- 72-508 - Estimations du nombre d'employés par province et par industrie, 1961-1968, Bil.
(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)
- 72-510 - Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Bil.
- 72-511 - Coûts de la main-d'oeuvre au Canada-Mines, carrières et puits de pétrole, 1969, Bil.
(Publication annuelle couvrant diverses branches d'activité sur une base cyclique ou irrégulière. Estimations de certains coûts de main-d'oeuvre, par groupe d'activité économique et par région - Publication conjointe de la Division du travail de Statistique Canada et de la Direction de l'économie et des recherches du ministère du Travail du Canada).
- 72-601 - Gains et heures de travail au Canada - Commerce de détail, septembre 1970, Bil.
(Gains hebdomadaires moyens, gains horaires moyens et heures hebdomadaires moyennes des employés des deux sexes dans le commerce de détail, selon la situation, ("à plein temps", "à temps partiel et occasionnels" et rattachés au "siège social", pour le Canada, les provinces et certaines régions urbaines).

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours, M., Engl.

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income, M. Bil.

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 - Estimates of Employees by Province and Industry, M. Bil.

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Engl.

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings, A. Engl.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing, 1969 Engl.

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Bil.

(Industry and area index numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and MCD moving average; average weekly hours and hourly earnings).

72-502 - Labour Income, 1926-58 - Out of print, Engl.

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68, Bil.

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 - Labour Costs in Manufacturing 1968, Bil.

72-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Bil.

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of Labour Canada).

72-601 - Earnings and Hours of Work in Canada - Retail Trade Industry, September 1970, Bil.

(Average Weekly Earnings, Average Hourly Earnings and Average Weekly Hours of Male and Female Employees in Retail Trade, by Employee Status i.e. "full-time", "part-time and casual" and "head office" employees for Canada, provinces and selected urban areas).

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.
